

1 H.710

2 Introduced by Representatives Priestley of Bradford, Anthony of Barre City,
3 Burrows of West Windsor, Chase of Chester, Christie of
4 Hartford, Jerome of Brandon, Masland of Thetford, Roberts of
5 Halifax, Sibia of Dover, Sims of Craftsbury, Templeman of
6 Brownington, White of Bethel, and Williams of Barre City

7 Referred to Committee on

8 Date:

9 Subject: Information technology; artificial intelligence; developers; deployers

10 Statement of purpose of bill as introduced: This bill proposes to regulate
11 developers and deployers of high-risk artificial intelligence systems and
12 developers of generative artificial intelligence systems.

13 An act relating to regulating developers and deployers of certain artificial
14 intelligence systems

15 It is hereby enacted by the General Assembly of the State of Vermont:

16 Sec. 1. 22 V.S.A. chapter 17 is added to read:

17 CHAPTER 17. ARTIFICIAL INTELLIGENCE

18 § 1001. DEFINITIONS

19 As used in this chapter:

20 (1) “Algorithmic discrimination” means an automated system’s

1 contribution to unjustified differential treatment or impacts that disfavor
2 individuals or groups of individuals based on their race, color, ethnicity, sex,
3 sexual orientation, gender identity, religion, age, national origin, limited
4 English proficiency, disability, veteran status, genetic information, or any other
5 classification protected by State or federal law.

6 (2) “Artificial intelligence” means any technology, including machine
7 learning, that uses data to train an algorithm or predictive model for the
8 purpose of enabling a computer system or service to autonomously perform
9 any task, including visual perception, language processing, and speech
10 recognition, that is normally associated with human intelligence or perception.

11 (3) “Artificial intelligence system” means any computer system or
12 service that incorporates or uses artificial intelligence.

13 (4) “Consequential decision” means any decision that has a material
14 legal, or similarly significant, effect on a consumer’s access to credit, criminal
15 justice, education, employment, health care, housing, or insurance.

16 (5) “Consumer” means any individual who is a resident of this State.

17 (6) “Deployer” means any person who deploys or uses a high-risk
18 artificial intelligence system to make a consequential decision.

19 (7) “Developer” means any person who develops or who intentionally
20 and substantially modifies:

21 (A) a high-risk artificial intelligence system; or

1 (B) a generative artificial intelligence system.

2 (8) “Digital watermark” means information that:

3 (A) is embedded in, and reasonably difficult to remove from, any
4 digital content; and

5 (B) enables a consumer who accesses the digital content to verify the
6 authenticity of the digital content and to determine whether the digital content
7 is synthetic digital content.

8 (9) “Foundation model” means any form of artificial intelligence that:

9 (A) is trained on broad data at scale;

10 (B) is designed for generality of output; and

11 (C) can be adapted to a wide range of distinctive tasks.

12 (10) “Generative artificial intelligence” means any form of artificial
13 intelligence, including a foundation model, that is able to produce synthetic
14 digital content, including audio, images, text, and videos.

15 (11) “Generative artificial intelligence system” means any computer
16 system or service that incorporates or uses generative artificial intelligence.

17 (12) “High-risk artificial intelligence system” means any artificial
18 intelligence system that, when deployed, makes or is a controlling factor in
19 making a consequential decision.

20 (13) “Machine learning” means any technique that enables a computer
21 system or service to autonomously learn and adapt by using algorithms and

1 statistical models to autonomously analyze and draw inferences from patterns
2 in data.

3 (14) “Red teaming” means a structured testing effort to find flaws and
4 vulnerabilities in an AI system, often in a controlled environment and in
5 collaboration with developers of AI.

6 (15) “Search engine” means any computer system or service that
7 searches for, and identifies, items in a database that correspond to keywords or
8 characters specified by a consumer, and is offered to, or used by, any
9 consumer.

10 (16) “Search engine operator” means any person who owns or controls a
11 search engine.

12 (17) “Significant update” means any new version, new release, or other
13 update to a high-risk artificial intelligence system that results in significant
14 changes to such high-risk artificial intelligence system’s use case, key
15 functionality, or expected outcomes.

16 (18)(A) “Social media platform” means a public or semipublic internet-
17 based service or application that:

18 (i) is used by a consumer;

19 (ii) is primarily intended to connect and allow users to socially
20 interact within the service or application; and

21 (iii) enables a consumer to:

1 (I) construct a public or semipublic profile for the purposes of
2 signing into and using the service or application;

3 (II) populate a public list of other persons with whom the
4 consumer shares a social connection within the service or application; and

5 (III) create or post content that is viewable by other persons,
6 including on message boards, in chat rooms, or through a landing page or main
7 feed that presents the consumer with content generated by other persons.

8 (B) “Social media platform” does not include a public or semipublic
9 internet-based service or application that:

10 (i) exclusively provides e-mail or direct messaging services;

11 (ii) primarily consists of news, sports, entertainment, interactive
12 video games, electronic commerce, or content that is preselected by the
13 provider or for which any chat, comments, or interactive functionality is
14 incidental to, directly related to, or dependent on the provision of such content;
15 or

16 (iii) is used by and under the direction of an educational entity,
17 including a learning management system or a student engagement program.

18 (19) “Social media platform operator” means any person who owns or
19 controls a social media platform.

20 (20) “Synthetic digital content” means any digital content, including any
21 audio, image, text, or video, that is produced by a generative artificial

1 intelligence system.

2 (21) “Trade secret” has the same meaning as in 9 V.S.A. § 4601.

3 § 1002. DUTIES OF DEVELOPERS OF HIGH-RISK ARTIFICIAL
4 INTELLIGENCE SYSTEMS

5 (a) Each developer shall use reasonable care to avoid any risk of
6 algorithmic discrimination that is a reasonably foreseeable consequence of
7 developing, or intentionally and substantially modifying, a high-risk artificial
8 intelligence system to make a consequential decision. In any enforcement
9 action brought by the Attorney General pursuant to section 1007 of this
10 chapter, there shall be a rebuttable presumption that a developer used
11 reasonable care as required under this subsection if the developer complied
12 with the provisions of this section.

13 (b) Except as provided in subsection (e) of this section, no developer of a
14 high-risk artificial intelligence system shall offer, sell, lease, give, or otherwise
15 provide a high-risk artificial intelligence system to a deployer unless the
16 developer provides to the deployer all of the following:

17 (1) a statement disclosing the intended uses of the high-risk artificial
18 intelligence system;

19 (2) documentation disclosing:

20 (A) the known limitations of the high-risk artificial intelligence
21 system, including any and all reasonably foreseeable risks of algorithmic

1 discrimination arising from the intended uses of the high-risk artificial
2 intelligence system;

3 (B) the purpose of the high-risk artificial intelligence system and the
4 intended benefits, uses, and deployment contexts of the high-risk artificial
5 intelligence system;

6 (C) a summary of the type of data collected from individuals and
7 processed by the high-risk artificial intelligence system when the high-risk
8 artificial intelligence system is used to make a consequential decision; and

9 (D) an analysis of any adverse impact that the deployer's deployment
10 or use of the high-risk artificial intelligence system will potentially have on
11 any individual, or group of individuals, on the basis of race, color, ethnicity,
12 sex, sexual orientation, gender identity, religion, age, national origin, limited
13 English proficiency, disability, or veteran status.

14 (3) documentation describing:

15 (A) the type of data used to program or train the high-risk artificial
16 intelligence system;

17 (B) how the high-risk artificial intelligence system was evaluated for
18 validity and explainability before the high-risk artificial intelligence system
19 was licensed or sold;

20 (C) the data governance measures used to cover the training data sets
21 and the measures used to examine the suitability of data sources, possible

1 biases, and appropriate mitigation;

2 (D) the outputs of the high-risk artificial intelligence system and how
3 these outputs may be used to make consequential decisions;

4 (E) the measures the developer has taken to mitigate any risk of
5 algorithmic discrimination that the developer knows may arise from
6 deployment or use of the high-risk artificial intelligence system; and

7 (F) how an individual can use the high-risk artificial intelligence
8 system to make, or monitor the high-risk artificial intelligence system when the
9 high-risk artificial intelligence system is deployed or used to make, a
10 consequential decision.

11 (c) Except as provided in subsection (e) of this section, each developer that
12 offers, sells, leases, gives, or otherwise provides to a deployer a high-risk
13 artificial intelligence system shall provide to the deployer the technical
14 capability to access, or otherwise make available to the deployer, all
15 information and documentation in the developer's possession, custody, or
16 control that the deployer reasonably requires to complete an impact assessment
17 pursuant to subsection 1003(c) of this chapter.

18 (d) Each developer shall post a clear and conspicuous statement on its
19 public-facing website summarizing:

20 (1) the types of high-risk artificial intelligence systems that:

21 (A) the developer has developed or has intentionally and

1 substantially modified; and

2 (B) are currently deployed or used by a deployer; and

3 (2) how the developer manages any reasonably foreseeable risk of
4 algorithmic discrimination that may arise from deployment or use of each
5 high-risk artificial intelligence system described in subdivision (1) of this
6 subsection.

7 (e) Nothing in subsections (b)–(d) of this section shall be construed to
8 require a developer to disclose any trade secret.

9 (f)(1) The Attorney General may require that a developer disclose to the
10 Attorney General any statement or documentation described in subsection (b)
11 of this section if the statement or documentation is relevant to an investigation
12 conducted by the Attorney General.

13 (2) The Attorney General may evaluate any statement or documentation
14 to ensure compliance with the provisions of this section, and any such
15 statement or documentation is exempt from public inspection and copying
16 under the Public Records Act.

17 (3) To the extent any information contained in any such statement or
18 documentation includes any information subject to the attorney-client privilege
19 or work product protection, disclosure to the Attorney General pursuant to this
20 subsection shall not constitute a waiver of that privilege or protection.

1 § 1003. DUTIES OF DEPLOYERS OF HIGH-RISK ARTIFICIAL
2 INTELLIGENCE SYSTEMS

3 (a) Each deployer shall use reasonable care to avoid any risk of algorithmic
4 discrimination that is a reasonably foreseeable consequence of deploying or
5 using a high-risk artificial intelligence system to make a consequential
6 decision. In any enforcement action brought by the Attorney General pursuant
7 to section 1007 of this chapter, there shall be a rebuttable presumption that a
8 deployer used reasonable care as required under this subsection if the deployer
9 complied with the provisions of this section.

10 (b) No deployer shall deploy or use a high-risk artificial intelligence system
11 to make a consequential decision unless the deployer has designed and
12 implemented a risk management policy and program for the high-risk artificial
13 intelligence system. The risk management policy shall specify the principles,
14 processes, and personnel that the deployer shall use in maintaining the risk
15 management program to identify, mitigate, and document any risk of
16 algorithmic discrimination that is a reasonably foreseeable consequence of
17 deploying or using such high-risk artificial intelligence system to make a
18 consequential decision. Each risk management policy and program designed,
19 implemented, and maintained pursuant to this subsection shall be:

20 (1) at least as stringent as the latest version of the Artificial Intelligence
21 Risk Management Framework published by the National Institute of Standards

1 and Technology or another nationally or internationally recognized risk
2 management framework for artificial intelligence systems; and

3 (2) reasonable, considering:

4 (A) the size and complexity of the deployer;

5 (B) the nature and scope of the high-risk artificial intelligence
6 systems deployed and used by the deployer, including the intended uses of
7 those systems;

8 (C) the sensitivity and volume of data processed in connection with
9 the high-risk artificial intelligence systems deployed and used by the deployer;
10 and

11 (D) the cost to the deployer to implement and maintain the risk
12 management program.

13 (c)(1) Except as provided in subdivisions (3) and (4) of this subsection, no
14 deployer shall deploy or use a high-risk artificial intelligence system to make a
15 consequential decision unless the deployer has completed an impact
16 assessment for the high-risk artificial intelligence system. The deployer shall
17 complete an impact assessment for a high-risk artificial intelligence system:

18 (A) before the deployer initially deploys the high-risk artificial
19 intelligence system;

20 (B) not later than 45 days following the close of each calendar year
21 during which the deployer used the high-risk artificial intelligence system to

1 make a consequential decision; and

2 (C) not later than 45 days after each significant update to the high-
3 risk artificial intelligence system by the deployer or developer.

4 (2) Each impact assessment completed pursuant to this subsection shall
5 include, at a minimum:

6 (A) a statement by the deployer disclosing:

7 (i) the purpose, intended use cases, and deployment context of,
8 and benefits afforded by, the high-risk artificial intelligence system; and

9 (ii) whether the deployment or use of the high-risk artificial
10 intelligence system poses a reasonably foreseeable risk of algorithmic
11 discrimination and, if so:

12 (I) the nature of the algorithmic discrimination; and

13 (II) the steps that have been taken, to the extent feasible, to
14 mitigate the risk;

15 (B) for each post-deployment impact assessment completed pursuant
16 to this subsection (c), the extent to which the high-risk artificial intelligence
17 system was used in a manner that was consistent with, or varied from, the
18 developer's intended uses of the high-risk artificial intelligence system;

19 (C) a description of:

20 (i) the data the high-risk artificial intelligence system processes as
21 inputs; and

1 (ii) the outputs the high-risk artificial intelligence system
2 produces;

3 (D) if the deployer used data to retrain the high-risk artificial
4 intelligence system, an overview of the type of data the deployer used to
5 retrain the high-risk artificial intelligence system;

6 (E) any metrics used to evaluate the performance and known
7 limitations of the high-risk artificial intelligence system;

8 (F) a description of any transparency measures taken concerning the
9 high-risk artificial intelligence system, including any measure taken to disclose
10 to a consumer in this State that the high-risk artificial intelligence system is in
11 use when the high-risk artificial intelligence system is in use; and

12 (G) a description of any postdeployment monitoring performed, and
13 user safeguards provided, concerning the high-risk artificial intelligence
14 system, including any oversight process established by the deployer to address
15 issues arising from deployment or use of the high-risk artificial intelligence
16 system as such issues arise.

17 (3) A single impact assessment may address a comparable set of high-
18 risk artificial intelligence systems deployed or used by a deployer.

19 (4) If a deployer completes an impact assessment for the purpose of
20 complying with another applicable law or regulation, that impact assessment
21 shall be deemed to satisfy the requirements established in this subsection if the

1 impact assessment is reasonably similar in scope and effect to the impact
2 assessment that would otherwise be completed pursuant to this subsection.

3 (5) A deployer who completes an impact assessment pursuant to this
4 subsection shall maintain the impact assessment, and all records concerning the
5 impact assessment, for a reasonable period of time, but not less than three
6 years.

7 (d) Not later than the time that a deployer uses a high-risk artificial
8 intelligence system to make a consequential decision concerning an individual,
9 the deployer shall:

10 (1) notify the individual that the deployer is using a high-risk artificial
11 intelligence system to make the consequential decision concerning the
12 individual; and

13 (2) provide to the individual:

14 (A) a statement disclosing the purpose of the high-risk artificial
15 intelligence system;

16 (B) contact information for the deployer; and

17 (C) a description, in plain language, of the high-risk artificial
18 intelligence system, which shall include a description of any and all human
19 components and how any and all automated components are used to inform the
20 consequential decision.

21 (e) Each deployer shall post a clear and conspicuous statement on its

1 public-facing website summarizing:

2 (1) the types of high-risk artificial intelligence systems that are currently
3 deployed or used by a deployer; and

4 (2) how the deployer manages any reasonably foreseeable risk of
5 algorithmic discrimination that may arise from use or deployment of each
6 high-risk artificial intelligence system described in subdivision (1) of this
7 subsection.

8 (f) Nothing in subsections (b)–(e) of this section shall be construed to
9 require a deployer to disclose any trade secret.

10 (g)(1) The Attorney General may require that a deployer disclose to the
11 Attorney General any risk management policy designed and implemented
12 pursuant to subsection (b) of this section, impact assessment completed
13 pursuant to subsection (c) of this section, or record maintained pursuant to
14 subdivision (c)(5) of this section if the risk management policy, impact
15 assessment, or record is relevant to an investigation conducted by the Attorney
16 General.

17 (2) The Attorney General may evaluate the risk management policy,
18 impact assessment, or record to ensure compliance with the provisions of this
19 section, and any such risk management policy, impact assessment, or record is
20 exempt from public inspection and copying under the Public Records Act.

21 (3) To the extent any information contained in any such risk

1 management policy, impact assessment, or record includes any information
2 subject to the attorney-client privilege or work product protection, disclosure to
3 the Attorney General pursuant to this subsection shall not constitute a waiver
4 of that privilege or protection.

5 § 1004. DUTIES OF DEVELOPERS OF GENERATIVE ARTIFICIAL
6 INTELLIGENCE SYSTEMS

7 (a)(1) Each developer shall use reasonable care to avoid any reasonably
8 foreseeable risk arising out of any development or any intentional and
9 substantial modification of a generative artificial intelligence system:

10 (A) of any unfair or deceptive treatment of, or unlawful disparate
11 impact on, consumers in this State;

12 (B) of any emotional, financial, mental, physical, or reputational
13 injury to consumers in this State;

14 (C) of any physical or other intrusion upon the solitude or seclusion,
15 or the private affairs or concerns, of consumers in this State if such intrusion
16 would be offensive to a reasonable person; or

17 (D) to the intellectual property rights of persons under applicable
18 State and federal intellectual property laws.

19 (2) In any enforcement action brought by the Attorney General pursuant
20 to section 1007 of this chapter, there shall be a rebuttable presumption that a
21 developer used reasonable care as required under subdivision (1) of this

1 subsection if the developer complied with the provisions of this section.

2 (b)(1) No developer who develops, or who intentionally and substantially
3 modifies, a generative artificial intelligence system on or after October 1, 2024
4 shall offer, sell, lease, give, or otherwise provide the generative artificial
5 intelligence system to any consumer in this State, or to any person doing
6 business in this State, unless the generative artificial intelligence system
7 satisfies the requirements established in this subsection.

8 (2) Each generative artificial intelligence system described in
9 subdivision (1) of this subsection shall:

10 (A) reduce and mitigate the reasonably foreseeable risks described in
11 subdivision (a)(1) of this section through efforts such as the involvement of
12 independent experts and documentation of any reasonably foreseeable, but
13 nonmitigable, risks;

14 (B) exclusively incorporate and process datasets that are subject to
15 data governance measures that are appropriate for generative artificial
16 intelligence systems, including data governance measures to examine the
17 suitability of data sources for possible biases and appropriate mitigation;

18 (C) achieve, throughout the lifecycle of the generative artificial
19 intelligence system, appropriate levels of performance, predictability,
20 interpretability, corrigibility, safety, and cybersecurity, as assessed through
21 appropriate methods, including model evaluation involving independent

1 experts, documented analysis, and extensive testing, during conceptualization,
2 design, and development of the generative artificial intelligence system; and

3 (D) incorporate science-backed standards and techniques that:

4 (i) authenticate and track the provenance of digital content;

5 (ii) detect synthetic digital content;

6 (iii) label synthetic digital content by using a digital watermark or
7 other mechanism; and

8 (iv) prevent the generative artificial intelligence system from
9 producing imagery that would constitute child sexual abuse materials under
10 13 V.S.A. § 2827 if an actual child was involved in the creation of the imagery,
11 or imagery of an identifiable person who is nude, as defined in 13 V.S.A.
12 § 2606, or who is engaged in sexual conduct, as defined in 13 V.S.A. § 2821,
13 without the person's consent.

14 (3) A developer who develops, or who intentionally and substantially
15 modifies, a generative artificial intelligence system described in subdivision
16 (1) of this subsection shall maintain all records related to the purposes set forth
17 in this subsection for a reasonable period of time, but not less than three years.

18 (c)(1) Except as provided in subdivisions (3) and (4) of this subsection, no
19 developer who develops, or who intentionally and substantially modifies, a
20 generative artificial intelligence system on or after October 1, 2024 shall offer,
21 sell, lease, give, or otherwise provide the generative artificial intelligence

1 system to any consumer in this State, or any person doing business in this
2 State, unless the developer has completed an impact assessment for the
3 generative artificial intelligence system pursuant to this subsection.

4 (2) Each impact assessment completed pursuant to this subsection shall
5 include, at a minimum, an evaluation of:

6 (A) the intended purpose of the generative artificial intelligence
7 system;

8 (B) the extent to which the generative artificial intelligence system
9 has been, or is likely to be, used;

10 (C) the extent to which any prior use of the generative artificial
11 intelligence system has harmed the health or safety of individuals, adversely
12 impacted the fundamental rights of individuals, or given rise to significant
13 concerns relating to the materialization of such harm or adverse impact, as
14 demonstrated by reports or documented allegations submitted to authorities of
15 competent jurisdiction;

16 (D) the potential extent to which use of the generative artificial
17 intelligence system may harm the health and safety of individuals or adversely
18 impact the fundamental rights of individuals, including the intensity of the
19 potential harm or adverse impact and the number of individuals likely to suffer
20 the harm or adverse impact;

21 (E) the extent to which individuals who may be harmed or adversely

1 impacted by the generative artificial intelligence system are dependent on the
2 outcomes produced by the generative artificial intelligence system for reasons
3 such as the legal or practical challenges of opting out of those outcomes;

4 (F) the extent to which individuals who may be harmed or adversely
5 impacted by users of the generative artificial intelligence system are
6 comparatively more vulnerable to experiencing those harms or impacts due to
7 factors such as an age imbalance, economic or social circumstances,
8 knowledge, or power; and

9 (G) the extent to which the outcomes produced by the generative
10 artificial intelligence system, other than outcomes affecting health and safety,
11 are easily reversible.

12 (3) A single impact assessment may address a comparable set of
13 generative artificial intelligence systems developed, or intentionally and
14 substantially modified, by a developer.

15 (4) If a developer completes an impact assessment for the purpose of
16 complying with another applicable law or regulation, that impact assessment
17 shall be deemed to satisfy the requirements established in this subsection if the
18 impact assessment is reasonably similar in scope and effect to the impact
19 assessment that would otherwise be completed pursuant to this subsection.

20 (5) A developer who completes an impact assessment pursuant to this
21 subsection shall maintain the impact assessment, and all records concerning the

1 impact assessment, for a reasonable period of time, but not less than three
2 years.

3 (d) Each developer that offers, sells, leases, gives, or otherwise provides
4 any generative artificial intelligence system described in subsections (b) and
5 (c) of this section to any search engine operator or social media platform
6 operator shall provide to the search engine operator or social media platform
7 operator the technical capability that the search engine operator or social media
8 platform operator reasonably requires to perform the search engine operator's
9 or social media platform operator's duties under section 1005 of this chapter.
10 Nothing in this subsection shall be construed to require a developer to disclose
11 any trade secret.

12 (e)(1) The Attorney General may require that a developer disclose to the
13 Attorney General any record maintained pursuant to subdivision (b)(3) of this
14 section, impact assessment completed pursuant to subsection (c) of this
15 section, or record maintained pursuant to subdivision (c)(5) of this section if
16 the impact assessment or record is relevant to an investigation conducted by
17 the Attorney General.

18 (2) The Attorney General may evaluate the impact assessment or record
19 to ensure compliance with the provisions of this section, and any such impact
20 assessment or record is exempt from public inspection and copying under the
21 Public Records Act.

1 (3) To the extent any information contained in any such impact
2 assessment or record includes any information subject to the attorney-client
3 privilege or work product protection, disclosure to the Attorney General
4 pursuant to this subsection shall not constitute a waiver of that privilege or
5 protection.

6 § 1005. SIGNAL INDICATING CONTENT LIKELY PRODUCED BY
7 GENERATIVE ARTIFICIAL INTELLIGENCE

8 Each search engine or social media platform that is offered to or used by
9 any consumer in this State to access any digital content that the search engine
10 operator or social media platform operator knows, or reasonably believes, is
11 synthetic digital content shall provide to the consumer a signal indicating that
12 the digital content was produced, or is reasonably believed to have been
13 produced, by generative artificial intelligence. The signal shall be available to
14 the consumer at all times that the consumer is consuming the digital content on
15 the search engine or social media platform.

16 § 1006. OTHER RIGHTS UNAFFECTED

17 (a) Nothing in this chapter shall be construed to restrict a developer's,
18 deployer's, search engine operator's, or social media platform operator's
19 ability to:

20 (1) comply with federal, State, or municipal ordinances, rules, or
21 regulations;

1 (2) comply with a civil, criminal, or regulatory inquiry, investigation,
2 subpoena, or summons by federal, State, municipal or other governmental
3 authorities;

4 (3) cooperate with law enforcement agencies concerning conduct or
5 activity that the developer, deployer, search engine operator, or social media
6 platform operator reasonably and in good faith believes may violate federal,
7 State, or municipal ordinances, rules, or regulations;

8 (4) investigate, establish, exercise, prepare for, or defend legal claims;

9 (5) provide a product or service specifically requested by a consumer;

10 (6) perform under a contract to which a consumer is a party, including
11 fulfilling the terms of a written warranty;

12 (7) take steps at the request of a consumer prior to entering into a
13 contract;

14 (8) take immediate steps to protect an interest that is essential for the life
15 or physical safety of a consumer or another individual;

16 (9) prevent, detect, protect against, or respond to security incidents,
17 identity theft, fraud, harassment, malicious or deceptive activities, or any
18 illegal activity; preserve the integrity or security of systems; or investigate,
19 report, or prosecute those responsible for any such actions;

20 (10) engage in public or peer-reviewed scientific or statistical research
21 in the public interest that adheres to all other applicable ethics and privacy laws

1 and is approved, monitored, and governed by an institutional review board or
2 similar independent oversight entity that determines:

3 (A) that the expected benefits of the research outweigh the risks
4 associated with the research; and

5 (B) whether the developer, deployer, search engine operator, or social
6 media platform operator has implemented reasonable safeguards to mitigate
7 the risks associated with the research;

8 (11) assist another developer, deployer, search engine operator, or social
9 media platform operator with any of the obligations imposed under this
10 chapter; or

11 (12) take any action that is in the public interest in the areas of public
12 health, community health, or population health, but solely to the extent that the
13 action is subject to suitable and specific measures to safeguard the public.

14 (b) The obligations imposed on developers, deployers, search engine
15 operators, and social media platform operators under this chapter shall not
16 restrict a developer's, deployer's, search engine operator's, or social media
17 platform operator's ability to:

18 (1) conduct internal research to develop, improve, or repair products,
19 services, or technologies;

20 (2) effectuate a product recall;

21 (3) identify and repair technical errors that impair existing or intended

1 functionality; or

2 (4) perform internal operations that are reasonably aligned with the
3 expectations of the consumer or reasonably anticipated based on the
4 consumer's existing relationship with the developer, deployer, search engine
5 operator, or social media platform operator.

6 (c) The obligations imposed on developers, deployers, search engine
7 operators, and social media platform operators under this chapter shall not
8 apply in the event that compliance by the developer, deployer, search engine
9 operator, or social media platform operator with any such obligation would
10 violate an evidentiary privilege under the laws of this State.

11 (d) If a developer, deployer, search engine operator, or social media
12 platform operator engages in any action pursuant to an exemption set forth in
13 this section, the developer, deployer, search engine operator, or social media
14 platform operator bears the burden of demonstrating that the action qualifies
15 for the exemption.

16 § 1007. ENFORCEMENT

17 (a) The Attorney General shall have exclusive authority to enforce the
18 provisions of this chapter.

19 (b)(1) Except as provided in subsection (f) of this section, during the period
20 from October 1, 2024 through March 31, 2026, the Attorney General shall,
21 prior to initiating any action for a violation of any provision of this chapter,

1 issue a notice of violation to the developer, deployer, search engine operator,
2 or social media platform operator if the Attorney General determines that a
3 cure is possible. If the developer, deployer, search engine operator, or social
4 media platform operator fails to cure the violation within 60 days following
5 receipt of the notice of violation, the Attorney General may bring an action
6 pursuant to this section.

7 (2) Not later than January 1, 2025, the Attorney General shall submit a
8 report to the General Assembly disclosing:

9 (A) the number of notices of violation the Attorney General has
10 issued;

11 (B) the nature of each violation;

12 (C) the number of violations that were cured during the 60-day cure
13 period; and

14 (D) any other matter the Attorney General deems relevant to the
15 purposes of the report.

16 (c) Except as provided in subsection (f) of this section, beginning on April
17 1, 2026, the Attorney General may issue a notice of violation and provide a
18 developer, deployer, search engine operator, or social media platform operator
19 the opportunity to cure an alleged violation of this chapter prior to initiating an
20 action. In determining whether to provide an opportunity to cure, the Attorney
21 General may consider:

1 (1) the number of violations;

2 (2) the size and complexity of the developer, deployer, search engine
3 operator, or social media platform operator;

4 (3) the nature and extent of the developer's, deployer's, search engine
5 operator's, or social media platform operator's business;

6 (4) the substantial likelihood of injury to the public;

7 (5) the safety of persons or property; and

8 (6) whether the alleged violation or violations were likely caused by
9 human or technical error.

10 (d) Nothing in this chapter shall be construed to create a private right of
11 action for violations of this chapter or of any other law.

12 (e) Except as provided in subsection (f) of this section, a person who
13 violates the requirements of this chapter commits an unfair and deceptive act in
14 trade and commerce in violation of 9 V.S.A. § 2453. The Attorney General
15 has the same authority to make rules, conduct civil investigations, enter into
16 assurances of discontinuance, and bring civil actions as is provided under
17 9 V.S.A. chapter 63, the Vermont Consumer Protection Act.

18 (f)(1) Notwithstanding any provision of this section to the contrary, the
19 Attorney General shall not commence any action against a developer,
20 deployer, search engine operator, or social media platform operator to enforce
21 the provisions of this chapter if:

1 (A) the high-risk artificial intelligence system, generative artificial
2 intelligence system, search engine, or social media platform, as applicable, is
3 in compliance with the latest version of the Artificial Intelligence Risk
4 Management Framework published by the National Institute of Standards and
5 Technology or another nationally or internationally recognized risk
6 management framework for artificial intelligence systems; and

7 (B) the developer, deployer, search engine operator, or social media
8 platform operator:

9 (i) encourages the deployers or users of the high-risk artificial
10 intelligence system, generative artificial intelligence system, search engine, or
11 social media platform, as applicable, to provide feedback to the appropriate
12 developer, deployer, search engine operator, or social media platform operator;

13 (ii) as a result of the feedback described in subdivision (i) of this
14 subdivision (1)(B), discovers a violation of any provision of this chapter; and

15 (iii) not later than 30 days after discovering the violation as set
16 forth in subdivision (ii) of this subdivision (1)(B), takes both of the following
17 actions:

18 (I) cures the violation by utilizing red teaming to test the high-
19 risk artificial intelligence system, generative artificial intelligence system,
20 search engine, or social media platform, as applicable; and

21 (II) notifies the Attorney General, in a form and manner

1 prescribed by the Attorney General, that the violation has been cured.

2 (2) The developer, deployer, search engine operator, or social media
3 platform operator bears the burden of demonstrating to the Attorney General
4 that the requirements established in subdivision (1) of this subsection have
5 been satisfied.

6 Sec. 2. 13 V.S.A. § 2606 is amended to read:

7 § 2606. DISCLOSURE OF SEXUALLY EXPLICIT IMAGES WITHOUT
8 CONSENT

9 (a) As used in this section:

10 * * *

11 (5) “Visual image” includes a photograph, film, videotape, recording,
12 synthetic image partially or fully generated by a computer system, or digital
13 reproduction.

14 * * *

15 Sec. 3. EFFECTIVE DATE

16 This act shall take effect on July 1, 2024.
