

1 State of Arkansas

As Engrossed: H5/20/16

Call Item 14

2 90th General Assembly

# A Bill

3 Third Extraordinary Session, 2016

HOUSE BILL 1014

4

5 By: Representative M. Hodges

6 By: Senator Burnett

7

8

## For An Act To Be Entitled

9

AN ACT TO AMEND THE LAW CONCERNING EARTHQUAKE

10

RESISTANT DESIGN REQUIREMENTS FOR BUILDINGS AND OTHER

11

STRUCTURES; TO DECLARE AN EMERGENCY; AND FOR OTHER

12

PURPOSES.

13

14

15

## Subtitle

16

TO AMEND THE LAW CONCERNING EARTHQUAKE

17

RESISTANT DESIGN REQUIREMENTS FOR

18

BUILDINGS AND OTHER STRUCTURES AND TO

19

DECLARE AN EMERGENCY.

20

21

22

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF ARKANSAS:

23

24

SECTION 1. Arkansas Code § 12-80-104(a)(2), concerning design requirements, is amended to read as follows:

25

26

(2)(A) Design loads and seismic design requirements shall be, as a minimum, those listed in the Chapter of Structure Loads and referenced chapters from the Arkansas Fire Prevention Code.

27

28

29

(B)(i) Buildings or other structures classified as Category I or Category II occupancies as described in Table 1604.5, Arkansas Fire Prevention Code, Volume II, 2012 Edition, or in American Society of Civil Engineers (ASCE) Standard 7-10, Table 1.5-1, that are constructed for manufacturing or industrial occupancy or for public works may be designed using the mapped ground motion response accelerations for a ten percent probability of exceeding the design seismic event in a fifty-year period based on United States Geological Survey data, instead of the mapped ground

30

31

32

33

34

35

36

1 motion response accelerations for a two percent or other probability of  
2 exceeding the design seismic event in a fifty-year period as set out in the  
3 Arkansas Fire Prevention Code, 2012 Edition, or subsequent editions of the  
4 Arkansas Fire Prevention Code if the alternate design standard has been  
5 properly adopted by ordinance in the locality in which the building or other  
6 structure is to be constructed.

7 (ii) Under subdivision (a)(2)(B)(i) of this section,  
8 SDS shall equal SMS and SD1 shall equal SM1 in lieu of the two-thirds (2/3)  
9 adjustment indicated in Equations 16.39 and 16.40 of the Arkansas Fire  
10 Prevention Code, Volume II, 2012 Edition, and the design seismic base shear V  
11 in any given direction shall be not less than that determined in accordance  
12 with Section 1607, Standard Building Code, 1997 Edition.

13 (iii) As used in subdivision (a)(2)(B)(ii), "SDS",  
14 "SMS", "SD1", and "SM1" mean the same as defined in the Arkansas Fire  
15 Prevention Code, Volume II, 2012 Edition.

16  
17 SECTION 2. EMERGENCY CLAUSE. It is found and determined by the  
18 General Assembly of the State of Arkansas that seismic design requirements  
19 found in the Arkansas Fire Prevention Code are overly restrictive; that the  
20 nature of these restrictions require businesses to expend significant  
21 resources; and that this act is immediately necessary to correct this  
22 restriction, to ease the burden on businesses considering construction in  
23 Arkansas, and to promote local economic development efforts. Therefore, an  
24 emergency is declared to exist, and this act being immediately necessary for  
25 the preservation of the public peace, health, and safety shall become  
26 effective on:

27 (1) The date of its approval by the Governor;

28 (2) If the bill is neither approved nor vetoed by the Governor,  
29 the expiration of the period of time during which the Governor may veto the  
30 bill; or

31 (3) If the bill is vetoed by the Governor and the veto is  
32 overridden, the date the last house overrides the veto.

33  
34 /s/M. Hodges

35 APPROVED: 05/23/2016
