Committee on Municipal Oversight & Elections

Overview

Allows elected officials accompanied by an expert to inspect all voting equipment used in a jurisdiction.

History

Prior to election day the Board of Supervisors or officer in charge of elections must have the automatic tabulating equipment and programs tested and checked for all offices and measures on the ballot. In elections with state or federal candidates, the Secretary of State is responsible for conducting tests for election day equipment. Tests must be overseen by two election inspectors of different political parties and are open to political party representatives, candidates, press and the public. Procedures and time periods for tests are established by the Secretary of State and repeated immediately before the start of the official count ([A.R.S. § 16-449](#)).
