## Summary of Legislation

The bill allows an early childhood development service district to include a portion of a special district, city, county, or other taxing district. Currently, it must include all the territory of any local jurisdiction that is part of the service district. It also allows an early childhood development service district to accept gifts, grants, and donations.

## Background

House Bill 19-1052 authorized the creation of early childhood development service districts to provide direct and indirect early childhood developmental services. The bill specified the requirements and process for the district's organization and required that districts formed and governed in accordance with the Special District Act. According to the Department of Local Affairs, there are not currently any early childhood development service districts.

## **Local Government**

To the extent the bill changes the size and location of potential early childhood service districts, the bill may impact tax revenue collected, or change initial administrative costs to adjust the territory of a district. Changes are expected to be minimal. The bill will also increase revenue for any service district that chooses to accept gifts, grants, and donations.

## **Effective Date**

The bill was signed into law by the Governor on March 17, 2022, and takes effect on August 9, 2022, assuming no referendum petition is filed.
