system. Once the application is complete, the county permitting agency or municipal permitting agency will review and approve, conditionally approve, or deny an EV charger permit:

- Within 30 days after the application is considered complete, for an application that proposes to build fewer than 13 charging stations on a parcel where the EV charging system is considered an accessory land use to the existing or primary land use on that parcel; or
- Within 60 days after the application is considered complete, for an application that proposes to build 13 or more charging stations or for applications where the EV charging system complies with the primary land use on that parcel.

If the county permitting agency or municipal permitting agency does not approve, conditionally approve, or deny a completed application for an EV charger permit within those time periods, the application is approved and the EV charger permit is granted to the applicant.

The county or municipality may deny an application if the application does not comply with the objective standards for EV charging systems set forth by the county or municipality or for health or safety reasons.

The bill also instructs the Colorado energy office to develop a model code regarding the approval of EV charger permits and provide counties and municipalities technical assistance in developing and administering the expedited EV charger permitting process.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) The transportation sector is a leading source of greenhouse gas
5 emissions and pollution, and vehicle electrification is a key component in
6 reducing greenhouse gas emissions in the transportation sector;

7 (b) According to the United States department of energy, an
8 electric vehicle produces an average of less than one-fourth of the average
9 emissions of a motor vehicle powered by an internal combustion engine
10 over its lifetime;

11 (c) To further promote the adoption of electric vehicles, the state

1 needs to encourage the rapid development of a network of electric vehicle
2 charging systems and other infrastructure to support those electric
3 vehicles;

4 (d) As of January 2024, there are more than 108,000 electric
5 vehicles on the road in Colorado but less than 5,000 Level 2 and only 980
6 DC fast charging electric vehicle charging ports available for public use;

7 (e) The "2023 Colorado EV Plan" calls for at least 5,800 Level 2
8 and 1,700 DC fast charging electric vehicle charging ports available for
9 public use by 2025; and

10 (f) The promotion of electric vehicles and the development of
11 electric vehicle charging systems is a matter of mixed state and local
12 concern.

13 (2) The general assembly further declares that it is in the best
14 interest of Coloradans and a matter of mixed state and local concern to
15 facilitate the permitting of electric vehicle charging systems by
16 streamlining the process for local governments to approve permits for
17 developing electric vehicle charging infrastructure.
