or drugs.

The bureau is authorized to impose a fee for performing the work of the laboratory. The amount of the fee shall not exceed the total amount of direct and indirect costs incurred by the bureau in performing the work of the laboratory. The bureau shall transmit all moneys collected as fees to the state treasurer, who shall credit the same to the state toxicology laboratory fund, which is created in the bill.

Under existing law, the general assembly makes an annual appropriation out of the moneys in the law enforcement assistance fund to the department of public health and environment (department) in an amount sufficient to pay for the costs of laboratory services and implied consent specialists. The bill requires a portion of this annual appropriation to go to the department to pay for the costs of evidential breath alcohol testing and a portion to go to the bureau to pay for the costs of toxicology laboratory services, including any education needs associated with such services.

Under existing law, the state board of health promulgates administrative regulations for the certification of laboratories to ensure that the collection and testing of samples is performed in a competent manner. The bill states that these regulations may include waiving specific certification requirements for laboratories that are accredited by the American board of forensic toxicology or the international standards organization.

The bill makes an appropriation.
