101 **CONCERNING THE ROLE AND MISSION OF COMMUNITY COLLEGES.**

**Bill Summary**

*(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://www.leg.state.co.us/billsummaries>.)*

The bill allows the state board for community colleges and occupational education (state board) to seek approval from the Colorado commission on higher education (CCHE) for technical, career, and workforce development bachelor of applied science degree programs that may be offered at community colleges within the state system. Among other things, the state board must show workforce and student demand for the degree program and cost-effectiveness to the student and the system.

SENATE  
2nd Reading Unamended  
January 28, 2014

The CCHE may approve bachelor of applied science degree programs that meet criteria established in the bill. Among other factors, the CCHE shall consider whether the bachelor of applied science degree program proposed by the state board is sufficiently distinguishable from an existing degree program at a state 4-year institution of higher education in the community college's geographic service area or whether the degree program could be delivered in the community college's service area through a statewide transfer agreement with a state 4-year institution of higher education. The state board may then authorize the establishment of an approved bachelor of applied science degree program at a community college within the state system.

Additionally, CCHE may approve technical, career, and workforce development bachelor of applied science degree programs at Aims community college after considering the same factors as those that apply to the approval of bachelor of applied science degree programs at other community colleges. Among other things, Aims community college must demonstrate workforce and student demand for the degree program and cost-effectiveness to the student and to Aims community college. The bill expands the role and mission of Aims community college to permit the bachelor of applied science degree programs.

Finally, the bill expands the role and mission of Western state Colorado university to allow the university to provide basic skills courses directly in Chaffee and Gunnison counties and to receive resident credit for those basic skills courses.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly  
3 hereby finds and declares that:

4 (a) It is a priority in Colorado to afford the citizens in rural and  
5 urban areas of the state greater access to higher education;

6 (b) Four-year bachelor of applied science degrees are of  
7 increasing importance in enabling individuals to qualify for and obtain  
8 jobs;

9 (c) Offering bachelor of applied science degrees in high-demand  
10 fields in the regions of the state is important to meeting the local  
11 economic development needs and is critical to reducing the educational

1 attainment gap between urban and rural areas;

2 (d) Offering bachelor of applied science degrees at community  
3 colleges will:

4 (I) Provide an opportunity for underserved and first generation  
5 students to continue their educational pathway in a familiar community  
6 college setting, thus making it more likely these students will persist and  
7 complete their degrees;

8 (II) Further the goal of closing the educational attainment gap  
9 between the majority and minority populations, as more than half of all  
10 minority students attend community colleges;

11 (III) Further the Colorado commission on higher education's  
12 master plan goal to increase the attainment of high-quality post-secondary  
13 credentials across all academic disciplines and throughout Colorado by  
14 at least 1,000 new certificates and degrees each year in order to meet the  
15 anticipated workforce demands and to enhance access to, and through,  
16 post-secondary education to ensure that the system reflects the changing  
17 demographics of the state; and

18 (IV) Provide affordable access to a four-year degree at a time  
19 when the general assembly is concerned about tuition increases and  
20 student debt levels.

21 (2) It is therefore in the best interests of the state of Colorado,  
22 with certain limitations, to allow community colleges within the state  
23 system to offer four-year bachelor of applied science degrees.

24 **SECTION 2.** In Colorado Revised Statutes, **amend** 23-60-201 as

22 requirements for native students and do not extend the time to degree  
23 completion beyond that required for native students in the same degree  
24 program. ALL CREDIT HOURS OF ACCEPTABLE COURSE WORK COMPLETED
