CONCERNING PROGRAMS TO REDUCE GROUND LEVEL OZONE THROUGH
INCREASED USE OF TRANSIT.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. Legislative declaration. (1) The general assembly hereby finds and declares that:

(a) Ground level ozone poses health risks to all Coloradans, especially to vulnerable populations including the elderly, young children, and people with asthma or other respiratory diseases;

(b) The negative effects of ozone exposure include pain when breathing deeply, coughing, sore throat, and inflamed or damaged airways;

Capital letters or bold & italic numbers indicate new material added to existing law; dashes through words or numbers indicate deletions from existing law and such material is not part of the act.

(c) Ozone exposure can also exacerbate existing respiratory conditions including asthma, emphysema, and chronic bronchitis and may be a potential cause of asthma;

(d) Ozone is one of the most common ambient air pollutants along the front range of Colorado;

(e) Ground level ozone forms when chemical reactions occur between nitrogen emitted from cars and other sources and volatile organic compounds in the presence of sunlight, making levels highest during the summer months;

(f) Colorado's ozone season, which runs from June 1 through August 31, poses significant health risks to Colorado's vulnerable residents and can force individuals to restrict their daily activities and stay indoors on days with high ozone levels;

(g) Reducing ground traffic and encouraging the use of public transit can help lower ozone-forming emissions and thereby reduce ground level ozone during the ozone season;

(h) Reducing ground level ozone serves an important public interest by protecting the health and well being of all Coloradans, especially those who are vulnerable to the negative impacts of ozone exposure;

(i) Offering free transit has increased transit use in other communities and can help rebuild ridership following the COVID-19 pandemic; and

(j) Creating a grant program to provide free public transit during ozone season will promote public health and serve the interests of all Coloradans.
