control commission, that apply to the historic uses of the wells;

- ! Licensed radioactive materials facilities must notify the department of public health and environment as soon as practicable upon discovery of any spill or release involving toxic or radioactive materials and provide an initial written report within 7 days after any such discovery; and
- ! The department must post the reports on the department's web site no later than 7 days after receipt by the department.

**Section 2** defines the "processing" of classified radioactive material as any physical or chemical concentration of classified material or underground aqueous extraction of ore, where a primary purpose is recovering uranium or thorium.

Current law requires a radioactive materials license applicant to pay up to \$50,000 to the local board of county commissioners for its reasonable and necessary expenses to respond to the application; **section 3** adjusts that figure for inflation since 2003. Section 3 also modifies the timing of the department's license review process, including the issuance of a draft decision and final draft decision.
