purpose of providing "Building Excellent Schools Today Act" (BEST) grants to fund public school air quality improvement projects. The public school capital construction assistance board (board) is authorized to make the grants and is required to prioritize grant awards based on grant applicants' existing calculated local match requirements for BEST grants, with applicants with the lowest matching money requirements having the highest priority and applicants with the highest matching money requirements having the lowest priority. The board is also required to submit a report about the grants to the general assembly during the department of education's 2022 "State Measurement for Accountable, Responsive, and Transparent (SMART) Government Act" presentation to legislative committees of reference. Notwithstanding the use of existing calculated local match requirements for grant prioritization purposes, the grants are exempted from existing matching money requirements for BEST grants. The bill makes an appropriation of \$10 million from the assistance fund to the board.
