imposed on all oil and gas produced, saved and sold or transported from the
premises in Idaho where produced a tax of two and one-half percent (2.5%)
of the market value gross income received by the producer of the oil or gas
produced at the site of production. ~~If the oil and gas is transported from
the premises prior to sale, then the tax will be determined based on the pub-
lished henry hub spot price for gas or wti cushing spot price for crude oil at
the close of business the day the oil or gas leaves the premises. Transporta-
tion from the premises prior to the sale does not include movement of oil or
gas from the wellhead to another site in Idaho by the same person for dehy-

the amount realized by the producer for sale of the oil or gas, whether the
sale occurs at the wellhead or after transportation of the product, with-
out deduction for transportation, manufacturing, and processing costs borne
by the producer. Where the parties to the sale are related parties and the
sales price is lower than the price for which that oil or gas could other-
wise have been sold to a ready, willing, and able buyer and where the taxpayer
was legally able to sell the oil or gas to such a buyer, gross income shall be
determined by reference to comparable arms-length sales of like kind, qual-

payable quarterly, and the sum so due shall be remitted to the state tax com-

1 mission, on or before the twentieth of the next month following the preced-
2 ing quarter in which the tax accrued, by the producer on behalf of himself and
