hold annual meetings with the officers and employees of the water and wastewater utilities located in each study area. Authorizes the utilities within a study area to meet voluntarily to determine area water and wastewater priorities, promote cooperation among the utilities, and consider other matters. Requires biennial reports from the utilities of each study area and from the IFA on the cooperative activities of the utilities. Provides that a utility applying to the IFA for a loan, a grant, or other financial assistance must demonstrate that its officers and employees have participated in study area activities. Requires every water utility, at least once in each calendar year, to perform an audit of its water distribution system to determine the causes of the water utility's "non-revenue water" (the difference between the amount of water entering the utility's distribution system and the amount of water received by the water utility's customers). In even-numbered years, requires the results of the annual audit to be verified by an independent evaluator and reported to the IFA and requires the IFA to issue a report concerning the audit results. Specifies that: (1) customer specific data, including information excluded from public access under Indiana's access to public records act; and (2) a required cybersecurity plan; submitted in connection with an application for a permit for a public water system or a wastewater treatment plant is exempt from the requirement that certain required analyses and plans must be made publicly available. Amends the definition of "customer lead service line improvement".
