

HOUSE SUMMARY OF SENATE AMENDMENTS

HB 417

2022 Regular Session

Hilferty

EARLY CHILDHOOD: Authorizes early learning centers to maintain a supply of auto-injectable epinephrine

Synopsis of Senate Amendments

1. Add the following to entities that may provide training on auto-injectable epinephrine to early learning center employees: a child care health consultant and an entity approved by the Dept. of Health.

Digest of Bill as Finally Passed by Senate

Proposed law requires early learning centers to adopt a policy authorizing the emergency administration of auto-injectable epinephrine.

Proposed law requires early learning centers to provide all parents with a copy of this policy.

Proposed law further requires that at least one employee at an early learning center receive training in the administration of auto-injectable epinephrine from one of the following: a registered nurse, a licensed physician, an anaphylaxis training organization, a child care health consultant, or an entity approved by the Dept. of Health.

Proposed law authorizes early learning centers to maintain a supply of auto-injectable epinephrine.

Proposed law provides liability protection for licensed early learning centers, employees of licensed early learning centers, licensed medical professionals who prescribe epinephrine auto-injectors to licensed early learning centers, and anaphylaxis training organizations and their personnel.

Present law provides for policies regarding administering auto-injectable epinephrine at public elementary and secondary schools. Requires that at least one employee at each school receive training in administering auto-injectable epinephrine from a registered nurse or licensed physician.

Proposed law retains present law except to provide that such training may be provided by an anaphylaxis training organization.

Proposed law defines anaphylaxis training organization, for purposes of early learning centers and public elementary and secondary schools, as a nationally recognized organization that provides anaphylaxis education or a training program whose leadership includes a physician authorized to practice medicine and surgery or osteopathic medicine and surgery and who is board-certified in allergy and immunology as that designation is issued by a medical specialty certifying board recognized by the American Bd. of Medical Specialties or American Osteopathic Assoc.

(Amends R.S. 17:436.(K)(1); Adds R.S. 17:407.50.2)
