HB No. 627

Abstract: Provides for changes to data processing procurement.

Present law provides for definitions related to data processing procurement including that "related services" are limited to service activities affecting the maintenance of data processing equipment or software and the providing of fiscal intermediary services in processing claims of health care providers.

Proposed law retains present law and adds that "related services" also mean those consulting services ancillary to the procurement of data processing hardware or software that would otherwise be governed by the provisions of professional, personal, consulting, and social services procurement in Ch. 16 of Title 39 of the L.R.S. of 1950, provided those consulting services are limited to the lesser of 20% of the procurement amount or \$250,000.

Present law provides that in data processing procurement, no contract entered into is to be on preprinted contract forms supplied by a vendor.

Proposed law adds that such contracts may be entered into on preprinted forms if approved by the director of state purchasing.
