HOUSE No. 2125

By Representative Pignatelli of Lenox and Senator Lovely, a joint petition (accompanied by bill, House, No. 2125) of Smitty Pignatelli, Joan B. Lovely and others relative to requirements and procedures necessary for first responders to provide urgent help to persons overdosing from opioids. Mental Health, Substance Use and Recovery.

[SIMILAR MATTER FILED IN PREVIOUS SESSION
SEE HOUSE, NO. 1747 OF 2019-2020.]

The Commonwealth of Massachusetts

**In the One Hundred and Ninety-Second General Court
(2021-2022)**

An Act helping overdosing persons in emergencies.

Whereas, The deferred operation of this act would tend to defeat its purpose, which is to authorize forthwith certain requirements and procedures necessary for first responders to provide urgent help to persons at risk of serious and deadly harm from opioids and opioid overdose, therefore it is hereby declared to be an emergency law, necessary for the immediate preservation of the public health.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

1 SECTION 1. Section 34A of chapter 94C of the General Laws, as appearing in the 2018
2 Official Edition, is hereby amended by inserting at the end thereof the following 2 subsections:-

3 (f) State and municipal law enforcement personnel and emergency medical personnel to
4 include, but not limited to, emergency medical technicians (EMTs), paramedics, and fire
5 department personnel may provide and transfer an opioid antagonist, which may include
6 naloxone, to an individual or to the individual’s responsible family member, friend, or other

7 person, along with instructions on administration and use of the opioid antagonist, to provide
8 opioid overdose protection to the individual. Said provision and transfer of an opioid antagonist
9 shall be based upon the good faith judgement of the law enforcement or emergency medical
10 personnel including but not limited to their experience, training, knowledge, observations and the
11 information provided by the individual at substantial risk of experiencing an opioid-related
12 overdose event or from the individual's family, friend or others with knowledge of the
13 individual's prior opioid use.

14 (g) A person acting in good faith may provide, administer or utilize testing equipment to
15 assist another person in identifying or in analyzing the strength, effectiveness or purity of a
16 controlled substance. A person who, in good faith, provides, administers or utilizes testing
17 equipment to assist another person in identifying or in analyzing the strength, effectiveness or
18 purity of a controlled substance shall not be charged or prosecuted for possession of drug
19 paraphernalia under section 32I. Testing equipment shall include, but not be limited to, fentanyl
20 test strips, colorimetric reagents, high-performance liquid chromatography, gas chromatography
21 and mass spectrometry.

22 SECTION 2. Section 201 of chapter 111, as so appearing, is hereby amended by inserting
23 after the first paragraph the following paragraph:-

24 Such first aid training shall also require instruction to administer opioid antagonists,
25 which may include naloxone, in overdosing emergencies. The instruction shall meet the
26 standards prescribed by the department. Police and fire members, shall satisfactorily complete an
27 initial instruction as soon as practical, but in no event more than 1 year after the date of their
28 employment. Notwithstanding, police and fire members who began their employment before the

29 effective date of the training requirement prescribed under this paragraph, shall satisfactorily
30 complete their instruction as soon as practical, but in no event more than 1 year after said date.
31 Satisfactory completion of a refresher course in administering opioid antagonists as approved by
32 the department shall be required every 3 years, unless the department by regulation establishes
33 an earlier time requirement.

34 SECTION 3. Said chapter 111, as so appearing, is hereby amended by inserting after
35 section 201, the following section:-

36 Section 201½. (a) As used in this section, the following words, unless the context clearly
37 requires otherwise, shall have the following meanings:-

38 “Emergency first response vehicle”, any official government motor vehicle and
39 motorized watercraft, which is intended and primarily operated to provide for the transport and
40 rapid response of first responders to emergencies involving the public.

41 “First responders”, members of police and fire departments, members of the state police
42 participating in highway patrol, and members of emergency reserve units of a volunteer fire
43 department or fire protection district, who are trained to administer an opioid antagonist pursuant
44 to the first aid training requirements under section 201; provided however, that first responders
45 shall not include police officers, fire fighters and persons engaged in police and fire work whose
46 duties are primarily clerical or administrative.

47 “Opioid antagonist”, Naloxone or other drug approved by the federal Food and Drug
48 Administration as a competitive narcotic antagonist used in the reversal of overdoses caused by
49 opioids and that is in a form approved by the commissioner for use by first responders; provided
50 any dosage of such drug, including any integrated delivery system to administer the drug (i) is

51 not expired under its labelled expiration date, and (ii) has no damage or other condition,
52 determinable by visual inspection or known information, that would affect adversely the drug's
53 use or suitability.

54 (b) A governmental entity or organization shall be responsible to provide its first
55 responders when on duty with an opioid antagonist for use in opioid overdose emergencies. This
56 requirement shall be complied with by implementing one, or any part or combination, of the
57 following methods: (i) equipping with an opioid antagonist any emergency first response vehicle
58 that it owns or has care and control, or (ii) supplying an opioid antagonist to its first responders
59 to be carried by such persons when on duty; provided the selected method when implemented
60 shall provide all first responders with reasonable direct access to an opioid antagonist in
61 overdose emergencies.

62 (c) The requirement of a government entity or organization to provide its first responders
63 with an opioid antagonist under this section, shall be subject to such drug's availability, provided
64 the government entity or organization has taken reasonable measures as soon as practicable, to
65 acquire and replenish its supply of an obtainable opioid antagonist to comply with this
66 requirement.

67 (d) No cost shall be assessed to first responders by their employing or appointing
68 governmental entity or organization for any opioid antagonist required under this section to be
69 supplied or made available to first responders, including any device necessary for first
70 responders to carry the drug when on duty, which shall be provided by such entity or
71 organization.

72 (e) The immunity provisions established under subsection (g) of section 19B of chapter
73 94C shall also apply to first responders who administer an opioid antagonist in accordance with
74 to said subsection.

75 SECTION 4. Subsections (b) through (d), inclusive, of Section 2 shall take effect 8
76 months after the passage of this act.
