Subd. 2. Computation of deferred annuity. (a) The deferred annuity, if any, accruing under subdivision 1, or section 352.22, subdivision 3, must be computed as provided in section 352.22, subdivision 3, on the basis of allowable service before termination of state service and augmented as provided herein. The required reserves applicable to a deferred annuity or to an annuity for which a former employee was eligible but had not applied or to any deferred segment of an annuity must be determined as of the date the benefit begins to accrue and augmented by interest compounded annually from the first day of the month following the month in which the employee ceased to be a state employee, or July 1, 1971, whichever is later, to the first day of the month in which the annuity begins to accrue. The rates of interest used for this purpose must be five percent compounded annually until January 1, 1981, and three percent compounded annually thereafter until January 1 of the year following the year in which the former employee attains age 55 or until January 1, 2011, whichever is earlier, and from that date the January 1 next following the attainment of age 55 to the effective date of retirement or until January 1, 2011, whichever is earlier, the rate is five percent compounded annually if the employee became an employee before July 1, 2006, and at 2.5 percent compounded annually until January 1, 2011, if the employee becomes an employee after June 30, 2006, and two percent compounded annually after December 31, 2010, irrespective of when the employee became a state employee. If a person has more than one period of uninterrupted service, the required reserves related to each period must be augmented by interest under this subdivision. The sum of the augmented required reserves so determined is the present value of the annuity. "Uninterrupted service" for the purpose of this subdivision means periods of covered employment during which the employee has not been separated from state service for more than two years. If a person repays a refund, the service restored by the repayment must be considered continuous with the next period of service for which the employee has credit with this system. The formula percentages used for each period of uninterrupted service must be those applicable to a new employee. The mortality table and interest assumption used to compute the annuity must be those in effect when the employee files application for annuity. This section does not reduce the annuity otherwise payable under this chapter.

(b) The retirement annuity or disability benefit of, or the survivor benefit payable on behalf of, a former state employee who terminated service before July 1, 1997, which is not first payable until after June 30, 1997, must be increased on an actuarial equivalent basis to reflect the change in the postretirement interest rate actuarial assumption under section 356.215, subdivision 8, from five percent to six percent under a calculation

Sec. 64. Minnesota Statutes 2008, section 354A.37, subdivision 2, is amended to read: Subd. 2. Eligibility for deferred retirement annuity. (a) Any coordinated member who ceases to render teaching services for the school district in which the teachers retirement fund association is located, with sufficient allowable service credit to meet the minimum service requirements specified in section 354A.31, subdivision 1, shall be entitled to a deferred retirement annuity in lieu of a refund pursuant to subdivision 1.   - (1) has been proposed by the governing board of the applicable retirement plan;

#### **EFFECTIVE DATE.** This section is effective the day following final enactment.

Sec. 68. Minnesota Statutes 2009 Supplement, section 356.215, subdivision 11, is amended to read:

Subd. 11. Amortization contributions. (a) In addition to the exhibit indicating the level normal cost, the actuarial valuation of the retirement plan must contain an exhibit for financial reporting purposes indicating the additional annual contribution sufficient to amortize the unfunded actuarial accrued liability and must contain an exhibit for contribution determination purposes indicating the additional contribution sufficient to amortize the unfunded actuarial accrued liability. For the retirement plans listed in subdivision 8, paragraph (c), the additional contribution must be calculated on a level percentage of covered payroll basis by the established date for full funding in effect when the valuation is prepared, assuming annual payroll growth at the applicable percentage rate set forth in subdivision 8, paragraph (c). For all other retirement plans, the additional annual contribution must be calculated on a level annual dollar amount basis.

(b) For any retirement plan other than the Minneapolis Employees Retirement Fund, the general employees retirement plan of the Public Employees Retirement Association, the general state employees retirement plan of the Minnesota State Retirement System, and the St. Paul Teachers Retirement Fund Association, if there has not been a change in

- (b) A person may receive, upon retirement, a retirement annuity from each enumerated retirement plan in which the person has at least one-half year of allowable service, and augmentation of a deferred annuity calculated at the appropriate rate under the laws governing each public pension plan or fund named in subdivision 3, based on the date of the person's initial entry into public employment from the date the person terminated all public service if:
- (1) the person has allowable service totaling an amount that allows the person to receive an annuity in any two or more of the enumerated plans;
- (2) the person has sufficient allowable service in total that equals or exceeds the applicable service credit vesting requirement of the retirement plan with the longest applicable service credit vesting requirement; and
- (2) (3) the person has not begun to receive an annuity from any enumerated plan or the person has made application for benefits from each applicable plan and the effective dates of the retirement annuity with each plan under which the person chooses to receive an annuity are within a one-year period.
- (c) The retirement annuity from each plan must be based upon the allowable service, accrual rates, and average salary in the applicable plan except as further specified or modified in the following clauses:
- (1) the laws governing annuities must be the law in effect on the date of termination from the last period of public service under a covered retirement plan with which the

- (3) the accrual rates to be used by each plan must be those percentages prescribed by each plan's formula as continued for the respective years of allowable service from one plan to the next, recognizing all previous allowable service with the other covered plans;
- (4) the allowable service in all the plans must be combined in determining eligibility for and the application of each plan's provisions in respect to reduction in the annuity amount for retirement prior to normal retirement age; and

Sec. 69. 54

(h) If the period of duplicated service credit is less than one-half year, or when added to other service credit with that plan is less than one-half year, the service credit must be ignored and a refund of contributions made to the person in accord with that plan's refund provisions.
