

HB 2305 -- TASK FORCE ON DISTRIBUTED ENERGY RESOURCES AND NET
METERING

SPONSOR: Davidson

The Task Force on Distributed Energy Resources and Net Metering expired December 31, 2023. This bill extends the work of the committee until December 31, 2026, and requires the committee to, in addition to the current requirements, report on potential legislation regarding changes to consumer protections for consumers of distributed energy resources.

The bill also caps the cost of the required distributed energy resources study at \$500,000 and allows the General Assembly to appropriate funds for the study.
