

HB 2359 --ACCOUNTABILITY PORTAL

SPONSOR: Basye

This bill expands the information to be made accessible on the Missouri Accountability Portal to include all forms of compensation and benefits paid to or on behalf of employees and all bonds issued by any public school district, and requires public school districts to supply all such information to be made accessible on the Portal to the Office of Administration.

Currently, all expenditures made by a municipality or county shall be maintained and made publicly accessible on the Missouri Local Government Expenditure Database. This bill amends the definition of expenditures to now include any form of compensation or benefit made to municipal or county employees, as defined in the bill.
