

# SENATE BILL NO. 943

102ND GENERAL ASSEMBLY

INTRODUCED BY SENATOR MAY.

3372S.01H

KRISTINA MARTIN, Secretary

## AN ACT

To repeal section 195.080, RSMo, and to enact in lieu thereof one new section relating to opioid prescriptions.

*Be it enacted by the General Assembly of the State of Missouri, as follows:*

Section A. Section 195.080, RSMo, is repealed and one new  
2 section enacted in lieu thereof, to be known as section 195.080,  
3 to read as follows:

195.080. 1. Except as otherwise provided in this  
2 chapter and chapter 579, this chapter and chapter 579 shall  
3 not apply to the following cases: prescribing,  
4 administering, dispensing or selling at retail of liniments,  
5 ointments, and other preparations that are susceptible of  
6 external use only and that contain controlled substances in  
7 such combinations of drugs as to prevent the drugs from  
8 being readily extracted from such liniments, ointments, or  
9 preparations, except that this chapter and chapter 579 shall  
10 apply to all liniments, ointments, and other preparations  
11 that contain coca leaves in any quantity or combination.

12 2. Unless otherwise provided in sections 334.037,  
13 334.104, and 334.747, a practitioner, other than a  
14 veterinarian, shall not issue an initial prescription for  
15 more than a seven-day supply of any opioid controlled  
16 substance upon the initial consultation and treatment of a  
17 patient for acute pain. Upon any subsequent consultation  
18 for the same pain, the practitioner may issue any

19 appropriate renewal, refill, or new prescription in  
20 compliance with the general provisions of this chapter and  
21 chapter 579. Prior to issuing an initial prescription for  
22 an opioid controlled substance, a practitioner shall consult  
23 with the patient regarding the quantity of the opioid and  
24 the patient's option to fill the prescription in a lesser  
25 quantity and shall inform the patient of the risks  
26 associated with the opioid prescribed. If, in the  
27 professional medical judgment of the practitioner, more than  
28 a seven-day supply is required to treat the patient's acute  
29 pain, the practitioner may issue a prescription for the  
30 quantity needed to treat the patient; provided, that the  
31 practitioner shall document in the patient's medical record  
32 the condition triggering the necessity for more than a seven-  
33 day supply and that a nonopioid alternative was not  
34 appropriate to address the patient's condition. The  
35 provisions of this subsection shall not apply to  
36 prescriptions for opioid controlled substances for a patient  
37 who is currently undergoing treatment for cancer or sickle  
38 cell disease, is receiving hospice care from a hospice  
39 certified under chapter 197 or palliative care, is a  
40 resident of a long-term care facility licensed under chapter  
41 198, or is receiving treatment for substance abuse or opioid  
42 dependence.

43         3. A pharmacist or pharmacy shall not be subject to  
44 disciplinary action or other civil or criminal liability for  
45 dispensing or refusing to dispense medication in good faith  
46 pursuant to an otherwise valid prescription that exceeds the  
47 prescribing limits established by subsection 2 of this  
48 section.

49         4. Unless otherwise provided in this section, the  
50 quantity of Schedule II controlled substances prescribed or

51 dispensed at any one time shall be limited to a thirty-day  
52 supply. The quantity of Schedule III, IV or V controlled  
53 substances prescribed or dispensed at any one time shall be  
54 limited to a ninety-day supply and shall be prescribed and  
55 dispensed in compliance with the general provisions of this  
56 chapter and chapter 579. The supply limitations provided in  
57 this subsection may be increased up to three months if the  
58 physician describes on the prescription form or indicates  
59 via telephone, fax, or electronic communication to the  
60 pharmacy to be entered on or attached to the prescription  
61 form the medical reason for requiring the larger supply.  
62 The supply limitations provided in this subsection shall not  
63 apply if:

64 (1) The prescription is issued by a practitioner  
65 located in another state according to and in compliance with  
66 the applicable laws of that state and the United States and  
67 dispensed to a patient located in another state; or

68 (2) The prescription is dispensed directly to a member  
69 of the United States Armed Forces serving outside the United  
70 States.

71 5. The partial filling of a prescription for a  
72 Schedule II substance is permissible as defined by  
73 regulation by the department of health and senior services.

74 **6. (1) Prior to issuing an initial prescription for a**  
75 **Schedule II controlled substance or any other opioid pain**  
76 **reliever in a course of treatment for acute or chronic pain**  
77 **and prior to issuing a third prescription of the same in the**  
78 **same course of treatment, a practitioner shall discuss with**  
79 **the patient, or the patient's parent or guardian if the**  
80 **patient is under eighteen years of age and is not**  
81 **emancipated, the risks associated with the drugs being**  
82 **prescribed, including, but not limited to, the following:**

83           (a) The risks of addiction and overdose associated  
84 with opioid drugs and the dangers of taking opioid drugs  
85 with alcohol, benzodiazepines, and other central nervous  
86 system depressants;

87           (b) The reasons why the prescription is necessary;

88           (c) Alternative treatments that may be available; and

89           (d) The risks associated with the use of the drugs  
90 prescribed, specifically that opioids are highly addictive,  
91 even when taken as prescribed; that there is a risk of  
92 developing a physical or psychological dependence on the  
93 controlled substance; and that the risks of taking more  
94 opioids than prescribed, or mixing sedatives,  
95 benzodiazepines, or alcohol with opioids, may result in  
96 fatal respiratory depression.

97           (2) The practitioner shall include a note in the  
98 patient's medical record that the patient or the patient's  
99 parent or guardian has discussed with the practitioner the  
100 risks of developing a physical or psychological dependence  
101 on the controlled substance and alternative treatments that  
102 may be available. The consultation described in this  
103 subsection shall satisfy the consultation requirements of  
104 subsection 2 of this section for initial prescriptions for  
105 more than a seven-day supply of any opioid controlled  
106 substance.

107           (3) The provisions of this subsection shall not apply  
108 to a prescription for a patient who is in active treatment  
109 for cancer, receiving hospice care from a hospice certified  
110 under chapter 197 or palliative care, is a resident of a  
111 long-term care facility licensed under chapter 198, or is  
112 receiving treatment for substance abuse or opioid dependence.
