

# SENATE BILL NO. 956

97TH GENERAL ASSEMBLY

---

---

INTRODUCED BY SENATOR SCHAAF.

Read 1st time February 27, 2014, and ordered printed.

TERRY L. SPIELER, Secretary.

6285S.01I

---

---

## AN ACT

To amend chapter 191, RSMo, by adding thereto three new sections relating to health care transparency, with a penalty provision.

---

---

*Be it enacted by the General Assembly of the State of Missouri, as follows:*

Section A. Chapter 191, RSMo, is amended by adding thereto three new  
2 sections, to be known as sections 191.1005, 191.1008, and 191.1010, to read as  
3 follows:

**191.1005. 1. For purposes of this section, the following terms  
2 shall mean:**

3 **(1) "Estimate of cost", an estimate given prior to the provision of  
4 medical services which is based on specific patient information or  
5 general assumptions about typical utilization and costs for medical  
6 services. Upon written request by a patient, a provider or insurer shall  
7 be required to provide the patient a timely estimate of cost for any  
8 elective or nonemergent health care service. Such requirement shall  
9 not apply to emergency health care services or any provider  
10 documenting to consumers the cost of the provider's twenty most  
11 common charges electronically or in paper format, or to any referral  
12 services that the provider does not provide directly to a patient. Any  
13 estimate of cost may include a disclaimer noting the actual amount  
14 billed may be different from the estimate of cost. An estimate of cost  
15 shall not be deemed an authorization for the provision of services;**

16 **(2) "Insurer", the same meaning as the term "health carrier" is  
17 defined in section 376.1350, and includes the state of Missouri for  
18 purposes of the rendering of health care services by providers under  
19 a medical assistance program of the state.**

20 **2. Programs of insurers that publicly assess and compare the  
21 quality and cost efficiency of health care providers shall conform to the**

22 following criteria:

23 (1) The insurers shall retain, at their own expense, the services  
24 of a nationally-recognized independent health care quality standard-  
25 setting organization to review the plan's programs for consumers that  
26 measure, report, and tier providers based on their performance. Such  
27 review shall include a comparison to national standards and a report  
28 detailing the measures and methodologies used by the health plan. The  
29 scope of the review shall encompass all elements described in this  
30 section and section 191.1008;

31 (2) The program measures shall provide performance  
32 information that reflects consumers' health needs. Programs shall  
33 clearly describe the extent to which they encompass particular areas  
34 of care, including primary care and other areas of specialty care;

35 (3) Performance reporting for consumers shall include both  
36 quality and cost efficiency information. While quality information may  
37 be reported in the absence of cost-efficiency, cost-efficiency  
38 information shall not be reported without accompanying quality  
39 information;

40 (4) When any individual measures or groups of measures are  
41 combined, the individual scores, proportionate weighting, and any  
42 other formula used to develop composite scores shall be  
43 disclosed. Such disclosure shall be done both when quality measures  
44 are combined and when quality and cost efficiency are combined;

45 (5) Consumers or consumer organizations shall be solicited to  
46 provide input on the program, including methods used to determine  
47 performance strata;

48 (6) A clearly defined process for receiving and resolving  
49 consumer complaints shall be a component of any program;

50 (7) Performance information presented to consumers shall  
51 include context, discussion of data limitations, and guidance on how to  
52 consider other factors in choosing a provider;

53 (8) Relevant providers and provider organizations shall be  
54 solicited to provide input on the program, including the methods used  
55 to determine performance strata;

56 (9) Providers shall be given reasonable prior notice before their  
57 individual performance information is publicly released;

58 (10) A clearly defined process for providers to request review of

59 their own performance results and the opportunity to present  
60 information that supports what they believe to be inaccurate results,  
61 within a reasonable time frame, shall be a component of any  
62 program. Results determined to be inaccurate after the  
63 reconsideration process shall be corrected;

64 (11) Information about the comparative performance of  
65 providers shall be accessible and understandable to consumers and  
66 providers;

67 (12) Information about factors that might limit the usefulness of  
68 results shall be publicly disclosed;

69 (13) Measures used to assess provider performance and the  
70 methodology used to calculate scores or determine rankings shall be  
71 published and made readily available to the public. Elements shall be  
72 assessed against national standards as defined in subdivisions (17) and  
73 (18) of this subsection. Examples of measurement elements that shall  
74 be assessed against national standards include: risk and severity  
75 adjustment, minimum observations, and statistical standards  
76 utilized. Examples of other measurement elements that shall be fully  
77 disclosed include: data used, how providers' patients are identified,  
78 measure specifications and methodologies, known limitations of the  
79 data, and how episodes are defined;

80 (14) The rationale and methodologies supporting the unit of  
81 analysis reported shall be clearly articulated, including a group  
82 practice model versus the individual provider;

83 (15) Sponsors of provider measurement and reporting shall work  
84 collaboratively to aggregate data whenever feasible to enhance its  
85 consistency, accuracy, and use. Sponsors of provider measurement and  
86 reporting shall also work collaboratively to align and harmonize  
87 measures used to promote consistency and reduce the burden of  
88 collection. The nature and scope of such efforts shall be publicly  
89 reported;

90 (16) The program shall be regularly evaluated to assess its  
91 effectiveness, accuracy, reliability, validity, and any unintended  
92 consequences, including any effect on access to health care;

93 (17) Measures shall be based on national standards. The primary  
94 source shall be measures endorsed by the National Quality Forum  
95 (NQF). When nonNQF measures are used because NQF measures do not

96 exist or are unduly burdensome, it shall be with the understanding that  
97 they will be replaced by comparable NQF-endorsed measures when  
98 available;

99 (18) Where NQF-endorsed measures do not exist, the next level  
100 of measures to be considered, to the extent practical, shall be those  
101 endorsed by the Ambulatory Care Quality Alliance, national accrediting  
102 organizations such as the National Committee for Quality Assurance,  
103 or the Joint Commission on the Accreditation of Healthcare  
104 Organizations, Healthcare Effectiveness and Data Information Set  
105 (HEDIS), other national provider specialty organizations, or federal  
106 agencies;

107 (19) The public, including consumers and employers, has a right  
108 to obtain reliable and valid information to assist them in comparing the  
109 cost and quality of health care services and health care providers. For  
110 such purpose, health carriers shall have the ability to use reliable data  
111 which is collected from medical claims, health care providers, medical  
112 records review or other sources, including the federal Centers for  
113 Medicare and Medicaid Services (CMS) and other entities for such  
114 purpose. Health carriers and health care providers are prohibited from  
115 entering into new contracts or amending existing contracts that limit  
116 the use of medical claims data to payment of claims or otherwise  
117 preclude health carriers from responding to the public's need for  
118 comparative cost, quality, and efficiency information, or other  
119 performance information, on health care services and health care  
120 providers. Health carriers may use claims and contracted rate data to  
121 report on cost, quality, and efficiency consistent with the patient  
122 charter or other nationally recognized standards, such as those issued  
123 by the National Committee for Quality Assurance. No health carrier or  
124 any other entity shall use such information in a manner that violates  
125 any state or federal law, including antitrust law; and

126 (20) A health plan shall be deemed compliant with this section  
127 if the health plan receives certification from the National Committee  
128 for Quality Assurance (NCQA) on programs that evaluate the quality of  
129 physicians and hospitals. The health plan is deemed to be in  
130 compliance for the length of time the NCQA certification has been  
131 granted or awarded.

191.1008. 1. Any person who sells or otherwise distributes to the

2 public health care quality and cost efficiency data for disclosure in  
3 comparative format to the public shall identify the measure source or  
4 evidence-based science behind the measure and the national consensus,  
5 multi-stakeholder, or other peer review process, if any, used to confirm  
6 the validity of the data and its analysis as an objective indicator of  
7 health care quality.

8       2. Articles or research studies on the topic of health care quality  
9 or cost efficiency that are published in peer-reviewed academic  
10 journals that neither receive funding from nor are affiliated with a  
11 health care insurer or by state or local government shall be exempt  
12 from the requirements of subsection 1 of this section.

13       3. (1) Upon receipt of a complaint of an alleged violation of this  
14 section by a person or entity other than a health carrier, the  
15 department of health and senior services shall investigate the  
16 complaint and, upon finding that a violation has occurred, shall be  
17 authorized to impose a penalty in an amount not to exceed one  
18 thousand dollars. The department shall promulgate rules governing its  
19 processes for conducting such investigations and levying fines  
20 authorized by law.

21       (2) Any rule or portion of a rule, as that term is defined in  
22 section 536.010 that is created under the authority delegated in this  
23 section shall become effective only if it complies with and is subject to  
24 all of the provisions of chapter 536, and, if applicable, section  
25 536.028. This section and chapter 536 are nonseverable and if any of  
26 the powers vested with the general assembly pursuant to chapter 536,  
27 to review, to delay the effective date, or to disapprove and annul a rule  
28 are subsequently held unconstitutional, then the grant of rulemaking  
29 authority and any rule proposed or adopted after August 28, 2014, shall  
30 be invalid and void.

191.1010. All alleged violations of sections 191.1005 to 191.1008 by  
2 a health insurer shall be investigated and enforced by the department  
3 of insurance, financial institutions and professional registration under  
4 the department's powers and responsibilities to enforce the insurance  
5 laws of this state in accordance with chapter 374.
