BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MONTANA:

SECTION 1. SECTION 15-6-135, MCA, IS AMENDED TO READ:

"15-6-135. Class five property -- description -- taxable percentage. (1) Class five property includes:

- (a) all property used and owned by cooperative rural electrical and cooperative rural telephone associations organized under the laws of Montana, except property owned by cooperative organizations described in 15-6-137(1)(a);
- (b) air and water pollution control and carbon capture equipment as defined in this section;
- (c) new industrial property as defined in this section;
- (d) any personal or real property used primarily in the production of ethanol-blended gasoline during construction and for the first 3 years of its operation;
- (e) all land and improvements and all personal property owned by a research and development firm, provided that the property is actively devoted to research and development;
- (f) machinery and equipment used in electrolytic reduction facilities;
- (g) all property used and owned by persons, firms, corporations, or other organizations that are engaged in the business of furnishing telecommunications services exclusively to rural areas or to rural areas and cities and towns of 1,200 permanent residents or less.

(2) (a) "Air and water pollution control and carbon capture equipment" means that portion of identifiable property, facilities, machinery, devices, or equipment certified as provided in subsections (2)(b) and (2)(c) and designed, constructed, under construction, or operated for removing, disposing, abating, treating, eliminating, destroying, neutralizing, stabilizing, rendering inert, storing, or preventing the creation of air or water pollutants that, except for the use of the item, would be released to the environment. This includes machinery, devices, or equipment used to capture carbon dioxide or other greenhouse gases. Reduction in pollutants obtained through

1 operational techniques without specific facilities, machinery, devices, or equipment is not eligible for certification
2 under this section.

3 (b) Requests for certification must be made on forms available from the department of revenue.
4 Certification may not be granted unless the applicant is in substantial compliance with all applicable rules, laws,
5 orders, or permit conditions. Certification remains in effect only as long as substantial compliance continues.

6 (c) The department of environmental quality shall promulgate rules specifying procedures, including
7 timeframes for certification application, and definitions necessary to identify air and water pollution control and
8 carbon capture equipment for certification and compliance. The department of revenue shall promulgate rules
9 pertaining to the valuation of qualifying air and water pollution control and carbon capture equipment. The
10 department of environmental quality shall identify and track compliance in the use of certified air and water
11 pollution control and carbon capture equipment and report continuous acts or patterns of noncompliance at a
12 facility to the department of revenue. Casual or isolated incidents of noncompliance at a facility do not affect
13 certification.

14 (d) To qualify for the exemption under subsection (5)(b)(i), the air and water pollution control and carbon
15 capture equipment must be placed into service after January 1, 2014, for the purposes of environmental benefit
16 or to comply with state or federal pollution control regulations. If the air or water pollution control and carbon
17 capture equipment enhances the performance of existing air and water pollution control and carbon capture
18 equipment, only the market value of the enhancement is subject to the exemption under subsection (5)(b)(i).

19 (e) Except as provided in subsection (2)(d), equipment that does not qualify for the exemption under
20 subsection (5)(b)(i) includes but is not limited to equipment placed into service to maintain, replace, or repair
21 equipment installed on or before January 1, 2014.

22 (f) A person may appeal the certification, classification, and valuation of the property to the state tax
23 appeal board. Appeals on the property certification must name the department of environmental quality as the
24 respondent, and appeals on the classification or valuation of the equipment must name the department of
25 revenue as the respondent.

26 (3) (a) "New industrial property" means any new industrial plant, including land, buildings, machinery,
27 and fixtures, used by new industries during the first 3 years of their operation. The property may not have been
28 assessed within the state of Montana prior to July 1, 1961.

8 (b) New industry includes only those industries that:

9 (i) manufacture, mill, mine, produce, process, or fabricate materials;

10 (ii) do similar work, employing capital and labor, in which materials unserviceable in their natural state

11 are extracted, processed, or made fit for use or are substantially altered or treated so as to create commercial

12 products or materials;

13 (iii) engage in the mechanical or chemical transformation of materials or substances into new products

14 in the manner defined as manufacturing in the North American Industry Classification System Manual prepared

15 by the United States office of management and budget;

16 (iv) engage in the transportation, warehousing, or distribution of commercial products or materials if 50%

17 or more of an industry's gross sales or receipts are earned from outside the state; or

18 (v) earn 50% or more of their annual gross income from out-of-state sales.

19 (5) (a) Except as provided in subsection (5)(b), class five property is taxed at 3% of its market value.

20 (b) (i) Air and water pollution control and carbon capture equipment placed in service after January 1,

21 2014, and that satisfies the criteria in subsection (2)(d) is exempt from taxation for a period of 10 years from the

22 date of certification, after which the property is assessed at 100% of its taxable value.

23 (ii) Fiber optic or coaxial cable facilities, as defined in 15-6-156, installed and placed in service on or after

24 [the effective date of this act] are exempt from taxation during installation and for a period of 5 years starting from

25 the date of deployment, after which the property exemption is phased out at a rate of 20% a year, with the

26 property being assessed at 100% of its taxable value after a 10-year period. In order to qualify for and maintain

27 the exemption, the owner of fiber optic or coaxial cable facilities must reinvest the tax savings from the exemption

28 for fiber optic or coaxial cable facilities IN NEW FIBER OPTIC OR COAXIAL CABLE within 2 years following the tax year

29 in which the tax savings are received by the owner of fiber optic or coaxial cable facilities without charging the
