

STATEMENT TO
SENATE, No. 3793

with Senate Floor Amendments
(Proposed by Senator SMITH)

ADOPTED: MAY 22, 2023

These floor amendments would require the Board of Public Utilities, as part of the study required by the bill, to determine whether financial incentives or other means and methods of promoting geothermal energy are necessary, and, if so, whether the costs of the incentives would be affordable and to what extent they should be borne by ratepayers.
