

Senate Bill No. 485—Committee on Finance

CHAPTER.....

AN ACT relating to public welfare; revising provisions governing payment by the State for certain care provided under the State Plan for Medicaid; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

The federal Patient Protection and Affordable Care Act provides that a state is not eligible for an increase in its federal medical assistance percentage if the state requires a political subdivision to pay a greater percentage of the nonfederal share of certain Medicaid expenditures than the respective percentages that would have been required by the state under the state plan that was in effect on December 31, 2009. (Public Law No. 111-148)

Under existing Nevada law, the State pays the nonfederal share of Medicaid for certain persons who are covered by Medicaid, who are admitted to certain medical facilities for more than 30 days and whose income is not greater than \$775 per month or 156 percent of the supplemental security income benefit rate established by federal law. (NRS 422.272) This bill eliminates the specific income requirement and authorizes the Director of the Department of Health and Human Services to determine annually the maximum income for persons for whom the State will pay the nonfederal share of Medicaid. The Director is required to ensure that the annual determination is consistent with federal law.
