15	
16	BE IT ENACTED BY THE PEOPLE OF THE STATE OF OKLAHOMA:
17	SECTION 1. NEW LAW A new section of law to be codified
18	in the Oklahoma Statutes as Section 2881 of Title 63, unless there
19	is created a duplication in numbering, reads as follows:
20	This act shall be known and may be cited as the "Oklahoma
21	Emergency Information and Secure Schools Program".
22	SECTION 2. NEW LAW A new section of law to be codified
23	in the Oklahoma Statutes as Section 2882 of Title 63, unless there

Req. No. 7251

As used in the Oklahoma Emergency Information and Secure Schools
 Program:

"Public safety agency" means any city, town, county,
 municipal corporation, public district, public trust, substate
 planning district, public authority or tribal authority located
 within this state which provides or has authority to provide
 firefighting, law enforcement, ambulance, emergency medical or other
 emergency services;

9 2. "Computer-aided dispatch" or "CAD" means a database 10 maintained by the public safety agency or public safety answering 11 point used in conjunction with 9-1-1 caller data;

12 3. "Emergency Information and Secure Schools Program" or 13 "EISSP" means a supplemental 9-1-1 and emergency management database 14 to be used in emergency scenarios and during incidents that occur 15 specifically at an elementary or secondary public school; and

4. "Public safety answering point" or "PSAP" means an entity
responsible for receiving 9-1-1 calls and processing those calls
according to specific operational policy.

SECTION 3. NEW LAW A new section of law to be codified in the Oklahoma Statutes as Section 2883 of Title 63, unless there is created a duplication in numbering, reads as follows:

A. The Emergency Information and School Safety Program (EISSP)
shall be a hosted, supplemental 9-1-1 and emergency management
database and shall be used by all public safety answering points

Req. No. 7251

1 (PSAP) and emergency management agencies within the state. The 2 supplemental database shall allow individuals to provide information 3 to be used in emergency scenarios and planning. The EISSP service 4 shall:

1. Collect a variety of formatted data relevant to 9-1-1,
emergency management and other public safety agencies. Among other
items, this information may include photographs of the individual,
physical descriptions, medical conditions, allergies, household
data, primary language indicators and emergency contacts;

10 2. Allow for information to be entered by individuals via a 11 secure website where the individual can elect to provide as little 12 or as much information as the individual chooses;

3. Allow for additional information to be sourced from a thirdparty and displayed alone or in combination with other information when provided to the EISSP by an individual;

4. Be compliant with all accessibility elements of Section 508
 of the Rehabilitation Act of 1973;

18 5. Manage the currency of the data through an aging and 19 reminder process at least twice per year. The reminder process 20 shall request that community members keep their data up-to-date. 21 Information deemed no longer up-to-date will not be displayed on the 22 system;

Automatically display data provided by individuals to 9-1-1
operators from various communication methods including, but not

Req. No. 7251

1 limited to, landline telephones, wireless telephones, Voice over 2 Internet Protocol (VoIP) and Internet Protocol (IP) when a call is 3 placed to 9-1-1 from a registered and confirmed phone number on a 4 preexisting monitor or screen within the PSAP;

5 7. Support the delivery of community member information via a
6 secure Internet connection to all PSAPs within Oklahoma;

8. Function across all 9-1-1 call-taking equipment in Oklahoma
and allow for the easy transfer of information into computer-aided
dispatch (CAD) or records management systems;

9. Make data available to first responders in the field through a secure portal only accessible to public safety and emergency management personnel;

13 10. Be designed to work in the environment of today or future 14 next-generation 9-1-1 (NG 9-1-1) systems;

15 11. Store data collected through the EISSP off-site in a secure
16 location and maintained by a third-party, nongovernmental entity;

17 12. By default, make accessible to public safety agencies 18 citizen data entered into the EISSP when a 9-1-1 call is placed from 19 a phone number associated with the EISSP data. When displayed for a 20 9-1-1 call, the EISSP information shall be presented to 21 telecommunicators for a limited period not to exceed forty-five (45) 22 minutes unless authorized by a designated supervisor; and

Allow citizens the option to share data with public safety
 agencies and emergency management during severe emergencies, such as

Req. No. 7251

1 weather-related disasters or mass casualty incidents that affect the 2 area where a citizen lives, without first placing a 9-1-1 call, in 3 order to help first responders during emergencies that require 4 evacuation or large-scale responses.

B. Public safety and emergency management agencies shall make
reasonable efforts to publicize the EISSP. Means of publicizing the
database may include, but are not limited to, pamphlets, social
media, neighborhood watch programs, community policing programs,
television, municipal notification systems and websites.

10 C. When additional citizen information is made available with 11 the 9-1-1 call, the telecommunicator may, where appropriate, relay 12 that information to responding personnel.

D. The information gathered as part of EISSP shall remain
strictly confidential. The information shall be used only to
provide assistance to 9-1-1 telecommunicators, first responders and
emergency management personnel. No public safety worker shall
knowingly violate this confidentiality clause.

18 E. EISSP shall offer a means of nonverbal communication to 19 callers using a mobile device to contact 9-1-1. The EISSP service 20 shall:

21 1. Enable telecommunicators to send an outgoing short message 22 service (SMS) text message to the mobile device of the caller 23 whenever an inbound mobile call to 9-1-1 is placed;

24

Req. No. 7251

2. Have the capability to initiate a nonverbal text-based
 conversation with a 9-1-1 caller even after that call has been
 disconnected, dropped or abandoned whether through the actions of
 the caller or due to service area or connectivity issues;

5 3. Have measures in place that enable nonverbal communication 6 only when initiated by the telecommunicator and which prevent the 7 caller from nonverbally communicating without first placing a 9-1-1 8 call; and

9 4. Have the ability to confine to a specific time period
10 nonverbal messages between a caller and 9-1-1 telecommunicator
11 beginning when the 9-1-1 call is connected. The time period shall
12 be extended only when authorized by a designated administrator.

F. The EISSP shall provide telecommunicators with the ability to make notations that are associated with the phone number of the incoming 9-1-1 call. The notations shall:

16 1. Be made available to public safety agencies during future 9-17 1-1 calls emanating from the number;

18 2. Be private and made available only when a 9-1-1 call is 19 placed from the number associated with the notation;

3. Be made and appended to a specific phone number which shall
be available only to public safety agencies; and

4. Not be shared publicly with any citizen or the community atlarge.

24

Req. No. 7251

SECTION 4. NEW LAW A new section of law to be codified
 in the Oklahoma Statutes as Section 2884 of Title 63, unless there
 is created a duplication in numbering, reads as follows:

A. The Emergency Information and Secure Schools Program (EISSP)
shall link elementary and secondary Oklahoma public schools directly
to 9-1-1 and first responders during emergency situations using a
public safety grade infrastructure designed for mission-critical
communications.

9 B. An application containing a mobile panic alarm shall be made 10 available to teachers, faculty and staff in elementary and secondary 11 Oklahoma public schools. Users of the application shall be 12 authorized by the superintendent of the school district to utilize 13 the technology on the campus of an elementary or secondary public 14 school. Once authorized, any user that presses the mobile panic 15 alarm will simultaneously trigger a traditional 9-1-1 call while 16 also sending out a short message service (SMS) text and email 17 messages to predetermined lists of on-site staff and personnel. The 18 message shall contain contextual information including:

The identity of the staff member that activated the mobile
 panic alarm;

21 2. The location of the elementary or secondary public school
22 where the emergency is taking place;

3. The time the mobile panic alarm was activated; and

Req. No. 7251

4. Contextual details that identify whether the emergency will
 require police, fire, emergency management services or other public
 safety personnel.

4 The message shall provide the capability for 9-1-1, first responders 5 or emergency management to send out follow-up incident notifications 6 via SMS to those on-site containing updates and instructions on how 7 to proceed.

8 The application shall be compatible with both iOS and Android 9 mobile operating systems.

10 С. In recognition of the fact that not all incidents that occur 11 on an elementary or secondary public school campus require 12 intervention from a public safety agency, the mobile panic alarm 13 application shall also provide internal communications tools that 14 enable SMS text and email message alerts to be sent to predetermined 15 lists of authorized users without activating a 9-1-1 call. The 16 internal communication tools must allow administrators to identify 17 employees who have specific training in crisis intervention, 18 cardiopulmonary resuscitation (CPR) or automated external 19 defibrillator (AED) certification and any other relevant skills that 20 enable a faculty or staff member to intervene and provide assistance 21 during specific types of emergencies.

D. In order to comply with the EISSP, the activation of a mobile panic alarm provided to staff at elementary or secondary public schools shall comply with the provisions identified in this

Req. No. 7251

1 act with regards to the collection and automatic presentation of 2 critical infrastructure and emergency planning data in an emergency, including any information which is required under the provisions of 3 4 Section 681 of Title 63 of the Oklahoma Statutes and any additional 5 data school officials wish to provide in digital format. Submitted information shall automatically be available to public safety 6 7 agencies whenever the mobile application provided to authorized teachers, faculty and staff is pressed to indicate an emergency on 8 9 an elementary or secondary public school campus. With regard to the 10 protection of buildings and facilities, the EISSP shall:

11 1. Have the ability to collect and aggregate data pertaining to school facilities that utilize EISSP services through a secure web 12 portal. Such data shall include, but not be limited to: the 13 14 collection of building floor plans, the location of emergency 15 equipment, landline telephone numbers at the facility, entry and 16 exit points for the facility, the names and contact information for 17 key building personnel and other information pertinent to public 18 safety agencies;

19 2. Offer a method of presenting such data to 9-1-1 and public 20 safety agencies when a landline 9-1-1 call is placed from a 21 registered facility, or when a person calls 9-1-1 from a mobile 22 phone while the person is on or proximate to the property of the 23 facility. This shall be achieved through a location-based 24 information system that can identify calls emanating from a property

Req. No. 7251

of the facility and through the routing engine for emergency communications, which shall identify the location of a caller and provide relevant information to 9-1-1 telecommunicators and public safety agencies;

3. Store and maintain information off-site in a secure location 5 by a third-party, nongovernmental entity and shall not require 6 7 storage or maintenance by telecommunicators or emergency personnel. Such information shall present itself automatically when a 9-1-1 8 9 call is placed from within a registered facility, which shall be 10 achieved through the location-based information capabilities of the 11 EISSP, or where the call is placed from a landline associated with 12 the facility; and

4. Offer a means of searching for a registered facility and accessing relevant data without requiring that a 9-1-1 call be placed from within the facility. Any information submitted regarding a facility or infrastructure must be approved by an authorized member of a public safety agency who shall be determined by local agencies.

E. 9-1-1 first responders and emergency management will have credentialed access to a web-based portal providing a view into mobile panic alarm activations from registered users and facilities. Additionally, this portal shall:

23 1. Be made available to all PSAPs, first responder agencies and 24 emergency management agencies; and

Req. No. 7251

Allow access to critical facility data from mobile panic
 button calls emanating from a registered user and facility.

3 SECTION 5. NEW LAW A new section of law to be codified 4 in the Oklahoma Statutes as Section 2885 of Title 63, unless there 5 is created a duplication in numbering, reads as follows:

6 The Emergency Information and Secure Schools Program (EISSP) 7 shall be implemented across the state upon the effective date of 8 this act. The EISSP shall be funded through an appropriation from 9 the Oklahoma Tobacco Settlement Endowment Trust Fund which shall 10 cover the initial costs of system deployment which include, but are 11 not limited to:

Costs relating to the installation of the EISSP system into
 Oklahoma public safety answering points (PSAP);

Any training associated with the deployment of said system;
 Licensing for all Oklahoma PSAPs to implement, deploy and
 utilize the EISSP;

17 4. Licensing for all Oklahoma elementary and secondary public
18 school teachers, faculty and staff to have access to the mobile
19 panic alarm application;

5. Initial costs related to the setup and approval of facility and school emergency planning information which shall be uploaded into the EISSP system by an authorized administrator;

6. Maintenance and technical support of the EISSP system which
shall be included by vendor to ensure continuity of services; and

Req. No. 7251

7. Any upgrades, updates or additional features offered by the EISSP vendor during the period in which the license of the state is valid and in good standing. SECTION 6. It being immediately necessary for the preservation of the public peace, health or safety, an emergency is hereby declared to exist, by reason whereof this act shall take effect and be in full force from and after its passage and approval. 56-1-7251 JM 03/02/17
