

April 13, 2023

SUMMARY OF BILL AS AMENDED (007264): Requires local education agencies (LEAs) and public charter schools to provide each high school senior, instead of students in general, the opportunity to take nationally recognized assessments in the 2023-24 school year. Establishes certain criteria that the assessments must meet in order to be used pursuant to this section. Deletes language that stipulates that the section is subject to available federal funds.

FISCAL IMPACT OF BILL AS AMENDED:

Increase State Expenditures - \$976,800/FY23-24

Assumptions for the bill as amended:

- During the 2021-22 school year, the Department of Education (DOE) contracted with three vendors of career readiness assessments, allowing high school seniors to take the assessments at no cost. That contract began in February 2022 and a total of 854 students opted into the department-funded offer to take career readiness assessments at no cost to the student or LEA between February and May 2022.
- The 2022-23 contract to offer career readiness assessments to high school students began February 1, 2023. DOE has no data on the number of students who took career readiness assessments outside of the contract period during this school year.
- DOE, LEAs, and public charter schools, must determine how to structure the length of the contract and the number of vendors to select for the procurement of the assessments if DOE funds the assessments for students.
- The projected average daily membership for grade 12 in FY23-24 is 66,451.
- The average cost of career readiness assessments offered to students that meet the criteria outlined in the proposed legislation is \$30.
- Mississippi career readiness assessment data from September 2021 to September 2022 indicates 51,046 assessments were completed. This is approximately 17,015 students, or about 49 percent of the senior class.
- Based on assessment data for high school seniors in Mississippi, it estimated that 32,561 (66,451 x 49%) high school seniors will take career readiness assessments in the 2023-24 school year.
- Pursuant to this legislation, the assessments are to be competitively procured by DOE.
- The provision of career readiness assessments will increase state expenditures by \$976,830 (32,561 x \$30) in FY23-24.
- According to DOE, federal funding is not available for these purposes.
