A BILL

To amend the State Department Basic Authorities Act of 1956 to establish a United States Ambassador at Large for Arctic Affairs, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-

3 SECTION 1. SHORT TITLE.

4 This Act may be cited as the “Arctic Diplomacy Act
5 of 2021”.

6 SEC. 2. SENSE OF CONGRESS.

7 It is the sense of Congress that—

8 (1) the rapidly changing Arctic environment—

(A) creates new national and regional security challenges due to increased military activity in the Arctic;

(B) heightens the risk of the Arctic emerging as a major theater of conflict in ongoing strategic competition;

(C) threatens maritime safety due to inadequate regional resource capacity to patrol the increase in vessel traffic this remote region is experiencing from the growing expanses of open Arctic water from diminished annual levels of sea ice;

(D) impacts public safety due to increased human activity in the Arctic region where search and rescue capacity remains very limited; and

(E) threatens the health of the Arctic's fragile and historically pristine environment and the unique and highly sensitive species found in the Arctic's marine and terrestrial ecosystems; and

(A) carefully evaluating a wide variety and dynamic set of security and safety risks unfolding in the Arctic;

(B) developing policies and making preparations for mitigating and responding to threats and risks in the Arctic, including by continuing to work with allies and partners in the Arctic region to deter potential aggressive activities and build Arctic competencies;

(C) adequately funding the National Earth System Prediction Capability to substantively improve weather, ocean, and ice predictions on time scales necessary for ensuring regional security and trans-Arctic shipping;

(D) investing in resources, including a significantly expanded icebreaker fleet, to ensure that the United States has adequate capacity to prevent and respond to security threats in the Arctic region; and

(E) pursuing diplomatic engagements with all Arctic countries to reach an agreement for—

(i) maintaining peace and stability in the Arctic region;

(ii) fostering cooperation on stewardship and safety initiatives in the Arctic region;

(iii) promoting environmentally sustainable natural resource management and economic development;

(iv) ensuring safe and efficient management of commercial maritime traffic in the Arctic;

(v) reducing black carbon and methane emissions in the Arctic region, including by working with observers of the Arctic Council, including India and China, to adopt mitigation plans consistent with the findings and recommendations of the Arctic Council's Framework for Action on Black Carbon and Methane; and

(vi) countering China's Polar Silk

Road initiative.
