

118TH CONGRESS
2D SESSION

H. RES. 1153

Recognizing the designation of the week of April 11 through April 17, 2024,
as the seventh annual “Black Maternal Health Week”.

IN THE HOUSE OF REPRESENTATIVES

APRIL 17, 2024

Ms. ADAMS (for herself, Ms. UNDERWOOD, Ms. KELLY of Illinois, Mr. HORSFORD, Ms. LEE of California, Ms. CLARKE of New York, Mr. HOYER, Mr. BISHOP of Georgia, Mr. TORRES of New York, Mrs. WATSON COLEMAN, Mr. TONKO, Mr. JOHNSON of Georgia, Mr. THANEDAR, Ms. SCANLON, Mr. ALLRED, Ms. LEE of Pennsylvania, Ms. McCLELLAN, Ms. BLUNT ROCHESTER, Mr. KRISHNAMOORTHI, Mr. COHEN, Mrs. RAMIREZ, Mr. KIM of New Jersey, Mr. MORELLE, Mr. CARSON, Ms. SLOTKIN, Ms. WILLIAMS of Georgia, Mr. McGARVEY, Mr. GOMEZ, Ms. WASSERMAN SCHULTZ, Ms. OMAR, Ms. PRESSLEY, Mr. VEASEY, Mrs. HAYES, Mrs. TORRES of California, Mrs. BEATTY, Ms. GARCIA of Texas, Ms. MOORE of Wisconsin, and Mr. PAYNE) submitted the following resolution; which was referred to the Committee on Energy and Commerce

RESOLUTION

Recognizing the designation of the week of April 11 through April 17, 2024, as the seventh annual “Black Maternal Health Week”.

Whereas, according to the Centers for Disease Control and Prevention, Black women in the United States are two to three times more likely than White women to die from pregnancy-related causes;

Whereas Black women in the United States suffer from life-threatening pregnancy complications, known as “maternal morbidities”, twice as often as White women;

Whereas maternal mortality rates in the United States are—

- (1) among the highest in the developed world; and
- (2) increasing rapidly, from 17.4 deaths per 100,000 live births in 2018, to 20.1 in 2019, 23.8 in 2020, and 32.9 in 2021;

Whereas the United States has the highest maternal mortality rate among affluent countries, in part because of the disproportionate mortality rate of Black women;

Whereas Black women are 50 percent more likely than all other women to deliver prematurely;

Whereas the high rates of maternal mortality among Black women span across—

- (1) income levels;
- (2) education levels; and
- (3) socioeconomic status;

Whereas structural racism, gender oppression, and the social determinants of health inequities experienced by Black women in the United States significantly contribute to the disproportionately high rates of maternal mortality and morbidity among Black women;

Whereas racism and discrimination play a consequential role in maternal health care experiences and outcomes of Black birthing people;

Whereas the overturn of Roe v. Wade, (410 U.S. 113 (1973)) impacts Black women and birthing people’s access to reproductive health care, and right to bodily autonomy, and further perpetuates reproductive oppression as a tool to control women’s body;

Whereas a fair and wide distribution of resources and birth options, especially regarding reproductive health care services and maternal health programming, is critical to closing the racial gap in maternal health outcomes;

Whereas, communities of color are disproportionately affected by maternity care deserts, where there are no or limited hospitals or birth centers offering obstetric care and no or limited obstetric providers, and have diminishing access to reproductive health care due to low Medicaid reimbursements, rising costs, and ongoing staff shortages;

Whereas Black midwives, doulas, perinatal health workers, and community-based organizations provide holistic maternal health care, but face structural and legal barriers to licensure, reimbursement, and provision of care;

Whereas COVID–19, which has disproportionately harmed Black Americans, is associated with an increased risk for adverse pregnancy outcomes and maternal and neonatal complications;

Whereas the COVID–19 pandemic has further highlighted issues within the broken health care system in the United States and the harm of that system to Black women and birthing people by exposing—

- (1) increased barriers to accessing prenatal and postpartum care, including maternal mental health care;
- (2) lack of uniform hospital policies permitting doulas and support persons to be present during labor and delivery;
- (3) inconsistent hospital policies regarding the separation of the newborn from a mother that is suspected positive for COVID–19;
- (4) complexities in COVID–19 vaccine drug trials including pregnant people;

- (5) increased rates of Cesarean section deliveries;
- (6) shortened hospital stays following delivery;
- (7) provider shortages and lack of sufficient policies to allow home births attended by midwives;
- (8) insufficient practical support for delivery of care by midwives, including telehealth access;
- (9) the adverse economic impact on Black mothers and families due to job loss or reduction in income during quarantine and the pandemic recession; and
- (10) pervasive racial injustice against Black people in the criminal justice, social, and health care systems;

Whereas new data from the Centers for Disease Control and Prevention has indicated that since the COVID–19 pandemic, the maternal mortality rate for Black women has increased by 26 percent;

Whereas, even as there is growing concern about improving access to mental health services, Black women are least likely to have access to mental health screenings, treatment, and support before, during, and after pregnancy;

Whereas Black pregnant and postpartum workers are disproportionately denied reasonable accommodations in the workplace, leading to adverse pregnancy outcomes;

Whereas Black pregnant people disproportionately experience surveillance and punishment, including shackling incarcerated people in labor, drug testing mothers and infants without informed consent, separating mothers from their newborns, and criminalizing pregnancy outcomes;

Whereas justice-informed, culturally congruent models of care are beneficial to Black women; and

Whereas an investment must be made in—

- (1) maternity care for Black women and birthing people, including support of care led by the communities most affected by the maternal health crisis in the United States;
- (2) continuous health insurance coverage to support Black women and birthing people for the full postpartum period up to at least one year after giving birth; and
- (3) policies that support and promote affordable, comprehensive, and holistic maternal health care that is free from gender and racial discrimination, regardless of incarceration; and

Whereas “Black Maternal Health Week” was founded in 2018, and led by Black Mamas Matter Alliance, Inc. (BMMA), to bring national attention to the maternal and reproductive health care crisis in the United States and the importance of reducing maternal mortality and morbidity among Black women and birthing people: Now, therefore, be it

- 1 *Resolved*, That the House of Representatives recog-
- 2 nizes—
 - 3 (1) the seventh annual “Black Maternal Health
 - 4 Week”; and
 - 5 (2) that—
 - 6 (A) Black women are experiencing high,
 - 7 disproportionate rates of maternal mortality
 - 8 and morbidity in the United States;
 - 9 (B) the alarmingly high rates of maternal
 - 10 mortality among Black women are unacceptable;

(C) in order to better mitigate the effects of systemic and structural racism, Congress must work toward ensuring that—

(i) the Black community has—

(I) safe and affordable housing;

(II) transportation equity;

(III) nutritious food;

(IV) clean air and water;

(V) environments free from tox-

ins;

(VI) safety and freedom from vi-

olence;

(VII) a living wage;

(VIII) equal economic oppor-

tunity;

(IX) a sustained and expansive

workforce pipeline for diverse perinatal professionals; and

(X) comprehensive, high-quality,

and affordable health care with access

to the full spectrum of reproductive

care; and

(ii) reform of the criminal justice and

family regulation systems to decriminalize

pregnancy outcomes, remove civil penalties,

1 end surveillance of families, and end man-
2 datory reporting within the system;

3 (D) in order to improve maternal health
4 outcomes, Congress must fully support and en-
5 courage policies grounded in the human rights,
6 reproductive justice, and birth justice frame-
7 works that address Black maternal health in-
8 equity;

9 (E) Black women and birthing people must
10 be active participants in the policy decisions
11 that impact their lives;

12 (F) in order to ensure access to safe and
13 respectful maternal health care for Black birth-
14 ing people, Congress must pass the Black Ma-
15 ternal Health Momnibus Act; and

16 (G) “Black Maternal Health Week” is an
17 opportunity—

18 (i) to deepen the national conversation
19 about Black maternal health in the United
20 States;

21 (ii) to amplify and invest in commu-
22 nity-driven policy, research, and quality
23 care solutions;

24 (iii) to center the voices of Black
25 Mamas, women, families, and stakeholders;

- 1 (iv) to provide a national platform for
- 2 Black-led entities and efforts on maternal
- 3 and mental health, birth, and reproductive
- 4 justice;
- 5 (v) to enhance community organizing
- 6 on Black maternal health; and
- 7 (vi) to support efforts to increase
- 8 funding, and advance policies for Black-led
- 9 and centered, community-based organiza-
- 10 tions, and perinatal birth workers that pro-
- 11 vide full spectrum reproductive, maternal,
- 12 and sexual health care.
