

117TH CONGRESS
2^D SESSION

H. RES. 1422

Supporting the designation of October 1, 2022, as National Ostomy
Awareness Day.

IN THE HOUSE OF REPRESENTATIVES

OCTOBER 4, 2022

Mr. PAYNE (for himself, Mr. RASKIN, Mr. CASE, and Mr. PAPPAS) submitted
the following resolution; which was referred to the Committee on Energy
and Commerce

RESOLUTION

Supporting the designation of October 1, 2022, as National
Ostomy Awareness Day.

Whereas an ostomy is a type of surgery that creates an open-
ing in the abdomen that allows for the removal of bodily
waste when a person has lost the normal function of di-
gestive or urinary systems due to birth defects, colorectal
cancer, bladder cancer, Crohn's disease, ulcerative colitis,
and other medical conditions;

Whereas an ostomy is also necessary in cases of severe ab-
dominal or pelvic trauma resulting from accidents or
from injuries sustained during military service;

Whereas approximately 725,000 to 1,000,000 people in the
United States have an ostomy or continent diversion,

with approximately 100,000 new ostomy procedures performed each year;

Whereas ostomy or continent diversion surgery can occur at any age and does not lower life expectancy;

Whereas through the efforts of ostomy support organizations, people needing these surgeries are becoming more aware of the opportunities for education, mutual aid, advocacy, and support that are of such great benefit to them and their families;

Whereas the aim of National Ostomy Awareness Day is to work toward a society where people with ostomies and intestinal or urinary diversions are universally accepted and supported socially, economically, medically, and psychologically;

Whereas October 2021 marked the 10th celebration of World Ostomy Day whose theme was “Ostomates’ Rights Are Human Rights—anytime and anywhere!” affirmed that health is a human right for everyone, at every age, and that this underserved patient population has patient rights and are entitled to quality ostomy health care;

Whereas public education and awareness is vital to ensure those who are living with an ostomy face no discrimination and are accepted as normal, healthy individuals;

Whereas through education and awareness we can erase the myths, stigma, and embarrassment that are sometimes associated with having an ostomy;

Whereas there is a deep commitment to the proper care and advancement of knowledge about bowel and urinary diversion surgery as a result of birth defects, disease, injury, and other digestive disorders; and

Whereas to increase public acceptance of ostomy surgery and continent diversion surgery and to remind those who have had surgery in the United States that by raising awareness they can help the world better understand this life-saving surgery and help people receive better ostomy care: Now, therefore, be it

1 *Resolved*, That the House of Representatives—

2 (1) supports the goals and ideals of National
3 Ostomy Awareness Day;

4 (2) encourages all persons to share with others
5 how “Ostomies are Life-Savers”; and

6 (3) encourages the people of the United States
7 to observe this annual day with the appropriate
8 awareness and educational activities.
