

118TH CONGRESS
1ST SESSION

H. RES. 262

Supporting the teaching of climate change in schools.

IN THE HOUSE OF REPRESENTATIVES

MARCH 28, 2023

Ms. LEE of California (for herself, Mr. FROST, Mrs. HAYES, Mr. BLUMENAUER, Ms. CLARKE of New York, Mr. CLEAVER, Mr. DAVIS of Illinois, Mr. HUFFMAN, Ms. MOORE of Wisconsin, Mr. NADLER, Mr. PANNETTA, Ms. SCHRIER, Ms. SEWELL, Mr. TONKO, and Ms. WILLIAMS of Georgia) submitted the following resolution; which was referred to the Committee on Education and the Workforce

RESOLUTION

Supporting the teaching of climate change in schools.

Whereas, to respond meaningfully to our rapidly changing climate, youth must be educated about the causes, ongoing effects, and current and potential solutions for the changing climate;

Whereas confronting the challenges of a changing climate requires bipartisan effort focused on educating and empowering future generations;

Whereas the impacts of climate-related disasters threaten the physical and mental safety of students by keeping them out of school, damaging infrastructure, and exacerbating Adverse Childhood Experiences;

Whereas, in 2021, the National Association of School Psychologists passed a resolution declaring that climate change negatively impacts the mental health of youth and asserting that climate education is a key factor in supporting student agency, self-efficacy, and resilience;

Whereas climate change disproportionately affects the fundamental rights of children to a climate system capable of sustaining human life, and which is preservative of fundamental rights, including the rights to life, liberty, property, and education;

Whereas failing to provide climate education to all students in our Nation worsens an existing education gap and limits career opportunities, exacerbating the impact of environmental pollution, redlining, and sacrifice zones;

Whereas K–12 climate education has widespread support, and according to a recent National Public Radio survey, 84 percent of parents with children under 18 years of age and 86 percent of teachers in the United States support climate education;

Whereas, according to a 2021 national Yale Climate Communications survey, teaching about global warming is 1 of 3 most supported climate policy solutions, with 77 percent of respondents in support;

Whereas research suggests that implementing climate education at a national scale can reduce emissions at the same magnitude as solar panels and electric vehicles;

Whereas investments in high school vocational trade and job training programs are critical in preparing the next generation to quickly engage in the estimated 9,000,000 renewable energy, clean infrastructure, and environmental restoration jobs by 2032;

Whereas, according to the Department of Energy 2022 Employment Report Fact Sheet, “renewable energy added the most new jobs in the electricity generation sector from 2020 to 2021”;

Whereas, according to the Bureau of Labor Statistics, 2 of the 3 fastest growing jobs are in the renewable energy sector, and these job openings are outpacing the number of workers qualified to fill them; and

Whereas, in order to deploy climate solutions at the necessary pace according to the best available science, the United States must engage the education sector at the local educational agency, State, and Federal levels: Now, therefore, be it

1 *Resolved*, That the House of Representatives—

2 (1) supports the integration, funding, and im-
3 plementation of interdisciplinary, solution-based cli-
4 mate education curriculum into K–12 schools in the
5 States, the District of Columbia, indigenous commu-
6 nities, and territories and possessions of the United
7 States;

8 (2) encourages the Department of Education to
9 work alongside States and local educational agencies
10 to define and implement comprehensive and inter-
11 disciplinary climate education standards, according
12 to the best available science;

13 (3) calls on the Department of Education to
14 support research that measures the impacts of cli-
15 mate education on student behavior;

1 (4) affirms that climate education should be
2 compatible with various learning styles in order to
3 provide equitable access to all students;

4 (5) encourages local and regional school boards
5 to implement place-based, solution-oriented, and de-
6 velopmentally appropriate climate education in all
7 grade levels and multiple subject areas;

8 (6) encourages those who develop climate edu-
9 cation curricula to address climate-induced trauma,
10 acknowledging the growing impact of climate change
11 on youths' mental health;

12 (7) commits to taking immediate action to ad-
13 vance climate education in the United States by pro-
14 viding funding and support for teacher education,
15 professional development, and the creation of best
16 practices for national climate education curricula
17 and teaching standards;

18 (8) encourages the incorporation of climate
19 change education as a critical component of the Na-
20 tional Climate Action Plan as a quantifiable means
21 of emissions reduction and as an essential leverage
22 point for scaling climate solutions and promoting re-
23 silience in local communities;

24 (9) calls for the formation of an Office of Cli-
25 mate Literacy and Career Development and a Cli-

1 mate Education Task Force in the Department of
2 Education in order to support local educational
3 agencies in implementing climate education and cre-
4 ating vocational programs to educate and prepare
5 students for renewable energy, transportation, and
6 regenerative agricultural careers;

7 (10) supports the efforts of States and school
8 boards to require climate education in curricular
9 guidelines and affirms the rights of parents to advo-
10 cate for the well-being of their children and the plan-
11 et; and

12 (11) encourages policymakers, States, local edu-
13 cational agencies, and schools to work with students,
14 teachers, and climate scientists when developing and
15 implementing climate education programs to reflect
16 the voices of young people and educators.
