## RESOLUTION

Expressing support for support of transgender acceptance.

Whereas at least 700,000 adults identify as transgender across our Nation;

Whereas every person has an innate gender identity, and transgender people have a deeply held gender identity or gender expression that differs from their assigned sex at birth;

Whereas our country needs more data on the transgender community for an accurate representation of the transgender population and their experiences;

Whereas the United States Government should modernize its surveys so that transgender individuals can be counted along with everyone else;

Whereas violence against the transgender community is a state of emergency for our Nation which calls for urgent action based on an understanding of the daily challenges transgender people face, whether it be harassment, discrimination, or violence for simply being who they are;

Whereas at least 21 transgender individuals have been murdered in our Nation during 2015, with most being women of color;

Whereas according to the 2011 National Transgender Discrimination Survey, 22 percent of transgender people who had interacted with police reported bias-based harassment from police, with transgender people of color reporting higher rates and 15 percent reporting being sexually assaulted while in police custody or incarceration, and almost half (46 percent) of all transgender people reported they would be uncomfortable seeking police assistance;

Whereas there is an increasing legal consensus that Federal sex discrimination laws prohibit bias based on sexual orientation and gender identity, there is a continuing lack of and need for explicit protections in employment, education, housing, public accommodations and other settings to ensure individuals' rights are understood and respected;

Whereas 20 percent of transgender people will experience homelessness, with more than half reporting being harassed at a homeless shelter by residents and staff;

Whereas transgender people continue to experience discriminatory and unlawful denials of health care and coverage, including anti-transgender insurance exclusions;

Whereas 82 percent of transgender youth report that they feel unsafe at school, 44 percent had been physically assaulted, 67 percent had been bullied online, and 64 percent had reported their property stolen or destroyed;

Whereas people of all ages, groups, and backgrounds may be victims of bullying, marginalization, and discrimination, and bullying may contribute to or worsen depression, anxiety, social isolation, or suicidality;

Whereas transgender people are disproportionately impacted by identification documents reflecting their gender identity—according to a 2014 study by the Williams Institute, an estimated 84,000 transgender individuals are disproportionately affected by strict voter ID laws across ten States;

Whereas it is estimated that more than 15,000 dedicated transgender members of our military are forced to serve in silence because of medically unjustified policies; and

Whereas America’s diversity is one of our greatest strengths; and our great Nation strives to promote the principles of equality and justice, and the inalienable rights of all people to life, liberty, and the pursuit of happiness: Now, therefore, be it

- 1        *Resolved*, That the House of Representatives—
