1 *Be it enacted by the Senate and House of Representa-*
 2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) **SHORT TITLE.**—This Act may be cited as the
 5 “Livable Communities Act of 2009”.

6 (b) **TABLE OF CONTENTS.**—The table of contents for
 7 this Act is as follows:

- Sec. 1. Short title; table of contents.
- Sec. 2. Findings.
- Sec. 3. Purposes.
- Sec. 4. Definitions.
- Sec. 5. Office of Sustainable Housing and Communities.
- Sec. 6. Interagency Council on Sustainable Communities.
- Sec. 7. Comprehensive planning grant program.
- Sec. 8. Sustainability challenge grant program.

8 **SEC. 2. FINDINGS.**

9 Congress finds the following:

10 (1) Demographic trends support the need for
 11 cooperation in land use planning and the develop-
 12 ment of housing and transportation. The population
 13 of the United States will grow from approximately
 14 307,000,000 people to approximately 439,000,000
 15 people during the period between 2009 and 2050, an
 16 increase of more than 40 percent.

17 (2) The demographic groups that are most like-
 18 ly to use public transportation are the groups that
 19 are projected to increase in size the most during the
 20 period between 2009 and 2025.

1 (3) By 2025, nearly 1 in every 5 people in the
2 United States will be 65 years of age or older.

3 (4) During the period between 1980 and 2000,
4 the growth of the largest 99 metropolitan areas in
5 the continental United States consumed 16,000,000
6 acres of rural land, or about 1 acre for every new
7 household.

8 (5) In 2007, traffic congestion caused people in
9 large and small metropolitan areas of the United
10 States to waste 4,200,000,000 hours in traffic and
11 to purchase an extra 2,800,000,000 gallons of fuel,
12 for a congestion cost of \$87,200,000,000. This rep-
13 represents a 5-fold increase in wasted time and cost
14 since 1982.

15 (6) The Energy Information Administration of
16 the Department of Energy forecasts that driving will
17 increase 59 percent between 2005 and 2030, far
18 outpacing the projected 23 percent increase in popu-
19 lation.

20 (7) According to the United States Census Bu-
21 reau, only 54 percent of households in the United
22 States have access to public transportation.

23 (8) In 2008, voters throughout the United
24 States approved State and local ballot initiatives
25 that supported public transportation 79 percent of

1 the time, even when it meant local taxes would be
2 raised or continued.

3 (9) Demographers estimate that as much as 30
4 percent of current demand for housing is for housing
5 in dense, walkable, mixed-use communities, and that
6 less than 2 percent of new housing is in this cat-
7 egory.

8 (10) The average household spends 19 percent
9 of its household budget on transportation, and some
10 very low-income households spend as much as 55
11 percent of the household budget on transportation.
12 Households with good access to public transpor-
13 tation spend only 9 percent of the household budget
14 on transportation, which increases the portion of the
15 household budget available for other critical house-
16 hold needs.

17 (11) The need for safe and affordable housing
18 is great. Fifty-four percent of renters spend more
19 than 30 percent of their income on housing costs,
20 and 29 percent of renters pay more than 50 percent
21 of their income for housing. In 2007, there was a
22 shortage of 2,800,000 units of affordable housing
23 for extremely low-income renter households.

24 (12) People who live in areas of compact devel-
25 opment (where housing, shopping, jobs, and public

1 transportation are in close proximity) drive 20 to 40
2 percent less than people who live in average develop-
3 ment patterns in the United States.

4 (13) When the effects of emissions savings from
5 passengers taking transit instead of driving and the
6 reduction in vehicle miles traveled due to the impact
7 of transit on land use are taken into account, public
8 transportation in the United States reduces carbon
9 dioxide emissions by nearly 37,000,000 metric tons
10 each year.

11 (14) Transportation accounts for 70 percent of
12 the oil consumed in the United States and nearly $\frac{1}{3}$
13 of carbon emissions in the United States come from
14 the transportation sector. Reducing the growth of
15 the number of miles driven and providing transpor-
16 tation alternatives through good planning and sus-
17 tainable development is a necessary part of the en-
18 ergy independence and climate change strategies of
19 the United States.

20 (15) A number of studies, reports, and articles
21 by organizations including the Environmental Pro-
22 tection Agency, the National Association of Realtors,
23 and the Transit Cooperative Research Project have
24 found that one of the keys to revitalizing and main-
25 taining the character of town centers and preserving

1 surrounding agricultural land in small and rural
2 communities is to prevent commercial and residen-
3 tial development on the outskirts of town, by pro-
4 moting integrated housing, economic, and transpor-
5 tation development in town centers.

6 (16) More than 1,600,000 rural households do
7 not have access to cars.

8 (17) The burden of transportation costs is espe-
9 cially heavy for low-income rural residents, because
10 residents of rural areas drive approximately 17 per-
11 cent more than residents of urban areas.

12 (18) Demand for public transportation in rural
13 and small town communities is growing. Between
14 2002 and 2005, ridership on small urban and rural
15 public transportation systems increased 20 percent.

16 (19) Poorly planned development in rural areas
17 can fragment agricultural and forest lands, pollute
18 waterways with surface water runoff, cause unneces-
19 sary environmental impacts, strain the capacity of
20 rural roads, and sap economic vitality from existing
21 “main street” commercial areas.

22 (20) Funding for integrated housing, transpor-
23 tation, energy, environmental, and economic develop-
24 ment and other land use planning efforts at the local

1 and regional levels is necessary to provide for sus-
2 tainable development and smart growth.

3 **SEC. 3. PURPOSES.**

4 The purposes of this Act are—

5 (1) to facilitate and improve the coordination of
6 housing, community development, transportation,

13 opment techniques, including transit-oriented devel-
14 opment;

19 and dependence on foreign oil;

20 (5) to provide affordable, energy-efficient, and
21 location-efficient housing choices for people of all
22 ages, incomes, races, and ethnicities, and to make
23 the combined costs of housing and transportation

2 in existing communities, in order to maximize the
3 cost effectiveness of existing infrastructure and pre-
4 serve undeveloped lands;

11 sources, including agricultural and rural land and
12 green spaces; and

13 (9) to support public health and improve qual-

4 **SECTION 1. SHORT TITLE.**

5 *This Act may be cited as the “Livable Communities*
6 *Act of 2010”.*

7 **SEC. 2. FINDINGS.**

8 *Congress finds the following:*

9 (1) *Demographic trends support the need for co-*
10 *operation in land use planning and the development*
11 *of housing and transportation. The population of the*
12 *United States will grow from approximately*
13 *307,000,000 people to approximately 439,000,000 peo-*
14 *ple during the period between 2010 and 2050, an in-*
15 *crease of more than 40 percent.*

16 (2) *By 2025, nearly 1 in every 5 people in the*
17 *United States will be 65 years of age or older.*

18 (3) *During the period between 1980 and 2000,*
19 *the growth of the 99 largest metropolitan areas in the*
20 *continental United States consumed 16,000,000 acres*
21 *of rural land, or about 1 acre for every new house-*
22 *hold.*

23 (4) *In 2007, traffic congestion caused people in*
24 *large and small metropolitan areas of the United*
25 *States to waste 4,200,000,000 hours in traffic and to*

1 *purchase an extra 2,800,000,000 gallons of fuel, for a*
2 *congestion cost of \$87,200,000,000. This represents a*
3 *5-fold increase in wasted time and cost since 1982.*

4 *(5) The Energy Information Administration of*
5 *the Department of Energy forecasts that driving will*
6 *increase 59 percent between 2005 and 2030, far out-*
7 *pacing the projected 23-percent increase in popu-*
8 *lation.*

9 *(6) According to the United States Census Bu-*
10 *reau, only 54 percent of households in the United*
11 *States have access to public transportation, limiting*
12 *their transportation options.*

13 *(7) In 2008, voters throughout the United States*
14 *approved State and local ballot initiatives that sup-*
15 *ported public transportation 79 percent of the time,*
16 *even when it meant local taxes would be raised or*
17 *continued.*

18 *(8) Demographers estimate that as much as 30*
19 *percent of current demand for housing is for housing*
20 *in dense, walkable, mixed-use communities, and that*
21 *less than 2 percent of new housing is in this category.*

22 *(9) The average household spends 19 percent of*
23 *its household budget on transportation, and some very*
24 *low-income households spend as much as 55 percent*
25 *of the household budget on transportation. Households*

1 *with good access to public transportation spend only*
2 *9 percent of the household budget on transportation,*
3 *which increases the portion of the household budget*
4 *available for other critical household needs.*

5 (10) *The need for safe and affordable housing is*
6 *great. Fifty-four percent of renters spend more than*
7 *30 percent of their income on housing costs, and 29*
8 *percent of renters pay more than 50 percent of their*
9 *income for housing. In 2007, there was a shortage of*
10 *2,800,000 units of affordable housing for extremely*
11 *low-income renter households. An estimated 6,000,000*
12 *households live with moderate or severe housing condi-*
13 *tions, including heating, plumbing, and electrical*
14 *problems, and 24,000,000 households face significant*
15 *lead-based paint hazards.*

16 (11) *People who live in areas of compact devel-*
17 *opment (where housing, shopping, jobs, and public*
18 *transportation are in close proximity) drive 20 to 40*
19 *percent less than people who live in average develop-*
20 *ment patterns in the United States.*

21 (12) *When the effects of emissions savings from*
22 *passengers taking transit instead of driving and the*
23 *reduction in vehicle miles traveled due to the impact*
24 *of transit on land use are taken into account, public*
25 *transportation in the United States reduces carbon*

1 *dioxide emissions by nearly 37,000,000 metric tons*
2 *each year.*

3 (13) *Transportation accounts for 70 percent of*
4 *the oil consumed in the United States and nearly $\frac{1}{3}$*
5 *of carbon emissions in the United States come from*
6 *the transportation sector. Reducing the growth of the*
7 *number of miles driven and providing transportation*
8 *alternatives through good planning and sustainable*
9 *development is a necessary part of the energy inde-*
10 *pendence and climate change strategies of the United*
11 *States.*

12 (14) *A number of studies, reports, and articles*
13 *by organizations including the Environmental Protec-*
14 *tion Agency, the National Association of Realtors,*
15 *and the Transit Cooperative Research Project have*
16 *found that one of the keys to revitalizing and main-*
17 *taining the character of town centers and preserving*
18 *surrounding agricultural land in small and rural*
19 *communities is to prevent commercial and residential*
20 *development on the outskirts of town, by promoting*
21 *integrated housing, economic, and transportation de-*
22 *velopment in town centers.*

23 (15) *More than 1,600,000 rural households do*
24 *not have access to cars.*

1 (16) *The burden of transportation costs is espe-*
2 *cially heavy for low-income rural residents, because*
3 *residents of rural areas drive approximately 17 per-*
4 *cent more than residents of urban areas.*

5 (17) *Demand for public transportation in rural*
6 *and small town communities is growing. Between*
7 *2002 and 2005, ridership on small urban and rural*
8 *public transportation systems increased 20 percent.*

9 (18) *Poorly planned development in rural areas*
10 *can fragment agricultural and forest lands, pollute*
11 *waterways with surface water runoff, cause unneces-*
12 *sary environmental impacts, strain the capacity of*
13 *rural roads, and sap economic vitality from existing*
14 *“main street” commercial areas.*

15 (19) *Funding for integrated housing, transpor-*
16 *tation, energy, environmental, and economic develop-*
17 *ment and other land use planning efforts at the local*
18 *and regional levels is necessary to provide for sustain-*
19 *able development and smart growth.*

20 (20) *Responsibilities related to health hazards in*
21 *housing are not clearly delineated among Federal*
22 *agencies. Categorical housing, health, energy assist-*
23 *ance, and environmental programs are narrowly de-*
24 *finied and often miss opportunities to address multiple*
25 *hazards in the same dwelling simultaneously. Ena-*

1 *bling Federal programs to embrace a comprehensive*
2 *healthy housing approach will require removing un-*
3 *necessary Federal statutory and regulatory barriers,*
4 *and creating incentives to advance the complementary*
5 *goals of environmental health, energy conservation,*
6 *and housing availability in relevant programs.*

7 **SEC. 3. PURPOSES.**

8 *The purposes of this Act are—*

9 *(1) to facilitate and improve the coordination of*
10 *housing, community development, transportation, en-*
11 *ergy, and environmental policy in the United States;*

12 *(2) to coordinate Federal policies and invest-*
13 *ments to promote sustainable development;*

14 *(3) to encourage regional planning for livable*
15 *communities and the adoption of sustainable develop-*
16 *ment techniques, including transit-oriented develop-*
17 *ment;*

18 *(4) to provide a variety of safe, reliable transpor-*
19 *tation choices, with special emphasis on public trans-*
20 *portation and complete streets, in order to reduce*
21 *traffic congestion, greenhouse gas emissions, and de-*
22 *pendence on foreign oil;*

23 *(5) to provide long-term affordable, accessible,*
24 *energy-efficient, and location-efficient housing choices*
25 *for people of all ages, incomes, races, and ethnicities,*

1 *and to make the combined costs of housing and trans-*
2 *portation more affordable to families;*

3 *(6) to support, revitalize, and encourage growth*
4 *in existing communities, in order to maximize the*
5 *cost-effectiveness of existing infrastructure and pre-*
6 *serve undeveloped lands;*

7 *(7) to promote economic development and com-*
8 *petitiveness by connecting the housing and employ-*
9 *ment locations of workers, reducing traffic congestion,*
10 *and providing families with access to essential serv-*
11 *ices;*

12 *(8) to preserve the environment and natural re-*
13 *sources, including agricultural and rural land and*
14 *green spaces; and*

15 *(9) to support public health and improve the*
16 *quality of life for the residents of, and workers in,*
17 *communities by promoting healthy, walkable neigh-*
18 *borhoods, access to green space, and the mobility to*
19 *pursue greater opportunities.*
