# A BILL

To designate Regional Ocean Partnerships of the National Oceanic and Atmospheric Administration, and for other purposes.

- 1       *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*
- 2       **SECTION 1. SHORT TITLE.**
- 3       *This Act may be cited as the “Regional Ocean Partnership Act”.*

1     **SEC. 2. FINDINGS; SENSE OF CONGRESS; PURPOSES.**

2         (a) FINDINGS.—Congress makes the following find-  
3         ings:

4             (1) The ocean and coastal waters of the United  
5         States are foundational to the economy, security,  
6         global competitiveness, and well-being of the United  
7         States and continuously serve the people of the  
8         United States and other countries as an important  
9         source of food, energy, economic productivity, recre-  
10         ation, beauty, and enjoyment.

11             (2) Over many years, the resource productivity  
12         and water quality of the ocean and coastal areas of  
13         the United States have been diminished by pollution,  
14         increasing population demands, economic develop-  
15         ment, and natural and man-made hazard events,  
16         both acute and chronic.

17             (3) Ocean and coastal areas of the United  
18         States are managed by State and Federal resource  
19         agencies and regulated on an interstate and regional  
20         scale by various overlapping Federal authorities,  
21         thereby creating a significant need for interstate co-  
22         ordination to enhance regional priorities, including  
23         the ecological and economic health of those areas.

24             (4) Tribal governments have unique expertise  
25         and knowledge important for the stewardship of the  
26         ocean and coastal waters of the United States.

1       (b) SENSE OF CONGRESS.—It is the sense of Con-  
2 gress that—

3           (1) the United States should seek to support  
4 interstate coordination of shared regional priorities  
5 relating to the management, conservation, resilience,  
6 and restoration of ocean and coastal areas to maxi-  
7 mize efficiencies through collaborative regional ef-  
8 forts by Regional Ocean Partnerships, in consulta-  
9 tion with Federal and State agencies, Tribal govern-  
10 ments, and local authorities;

11          (2) such efforts would enhance existing and ef-  
12 fective State coastal management efforts based on  
13 shared regional priorities; and

14          (3) Regional Ocean Partnerships should consult  
15 with Tribal governments and may include represen-  
16 tation from Tribal governments.

17       (e) PURPOSES.—The purposes of this Act are as fol-  
18 lows:

19           (1) To complement and expand cooperative vol-  
20 untary efforts intended to manage and restore ocean  
21 and coastal areas spanning across multiple State  
22 boundaries.

23           (2) To expand Federal support for monitoring,  
24 data management, and restoration activities in ocean  
25 and coastal areas.

1                     (3) To commit the United States to a comprehensive cooperative program to achieve improved  
2 water quality in, and improvements in the productivity of living resources of, all coastal ecosystems.

3                     (4) To authorize Regional Ocean Partnerships  
4 as intergovernmental coordinators for shared interstate and regional priorities relating to the collaborative management of the large marine ecosystems,  
5 thereby reducing duplication of efforts and maximizing opportunities to leverage support in the  
6 ocean and coastal regions.

7                     (5) To empower States to take a lead role in  
8 managing oceans and coasts.

9                     (6) To incorporate Tribal interests in the management of oceans and coasts and provide funding  
10 to support Tribal ocean and coastal resiliency activities in coordination with Regional Ocean Partnerships.

11                     (7) To enable Regional Ocean Partnerships, or designated fiscal management entities of such partnerships, to receive Federal funding to conduct the scientific research, conservation and restoration activities, and priority coordination on shared regional priorities necessary to achieve the purposes described in paragraphs (1) through (6).
