

117TH CONGRESS
1ST SESSION

S. 343

To require the Transportation Security Administration to conduct a feasibility study on the use of canine units for COVID–19 detection at airports.

IN THE SENATE OF THE UNITED STATES

FEBRUARY 22, 2021

Mr. SCOTT of Florida (for himself and Ms. SINEMA) introduced the following bill; which was read twice and referred to the Committee on Commerce, Science, and Transportation

A BILL

To require the Transportation Security Administration to conduct a feasibility study on the use of canine units for COVID–19 detection at airports.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Fly Safe Canine
5 COVID Detection Act of 2021”.

6 **SEC. 2. FEASIBILITY STUDY ON USE OF CANINE UNITS TO**
7 **DETECT COVID–19 AT AIRPORTS.**

8 (a) IN GENERAL.—The Administrator of the Trans-
9 portation Security Administration (in this section referred

1 to as the “Administrator”), in consultation with the Sec-
2 retary of Transportation, the Secretary of Homeland Se-
3 curity, the Secretary of Health and Human Services, and
4 the Director of the Centers for Disease Control and Pre-
5 vention, shall conduct a study to assess—

6 (1) the feasibility of using canines to detect the
7 presence of SARS-CoV-2, the virus that causes the
8 coronavirus disease 2019 (commonly known as
9 “COVID-19”), in individuals infected with the
10 virus;

11 (2) if using canines to detect the presence of
12 SARS-CoV-2 is feasible, whether canine units could
13 be used at airports to screen passengers, individuals
14 accompanying passengers, crew members, and other
15 individuals who pass through airports and airport
16 security screening locations for SARS-CoV-2 infec-
17 tion; and

18 (3) if using canine units to conduct screening
19 described in paragraph (2) is feasible, how such
20 screening would be implemented and what metrics
21 would be used to monitor the efficacy of the screen-
22 ing.

23 (b) ASSESSMENT OF EFFICACY.—

24 (1) IN GENERAL.—In conducting the study re-
25 quired by subsection (a), the Administrator shall

1 conduct a comprehensive review and analysis of
2 SARS-CoV-2 detection solutions to determine the
3 efficacy of canines to detect SARS-CoV-2 in indi-
4 viduals.

5 (2) USE OF REVIEW.—The Administrator shall
6 use the results of the review and analysis required
7 by paragraph (1) to determine the biological detec-
8 tion capabilities of canines and to inform the oper-
9 ational factors and considerations necessary for the
10 deployment of canine units at airports to detect
11 SARS-CoV-2.

12 (c) ADDITIONAL ELEMENTS.—In conducting the as-
13 sessments required by subsections (a) and (b), the Admin-
14 istrator shall assess the following:

15 (1) The probability of canines responding to the
16 presence of SARS-CoV-2.

17 (2) The specificity of response by canines to
18 SARS-CoV-2 compared to their response to a pool
19 of similar viruses and controls.

20 (3) How close canine units must be to individ-
21 uals to detect SARS-CoV-2 at a high sensitivity
22 and specificity.

23 (4) The effectiveness of canine units in detect-
24 ing SARS-CoV-2 in symptomatic carriers compared
25 to asymptomatic carriers.

1 (5) Other valid measures to determine the effi-
2 cacy of using canine units to screen for SARS-CoV-
3 2 at airports, such as the accuracy of detection and
4 the risks of false positives and false negatives.

5 (6) Identification of training and policy gaps
6 that are critical to be addressed before implementing
7 a program to use canine units at airports to screen
8 passengers, individuals accompanying passengers,
9 crew members, and other individuals who pass
10 through airports and airport security screening loca-
11 tions, for infection with SARS-CoV-2.

12 (d) CONSIDERATIONS.—In conducting the study re-
13 quired by subsection (a), the Administrator shall consider
14 the following:

15 (1) Opportunities to leverage established, pre-
16 existing scientific information regarding detection of
17 SARS-CoV-2 by canines.

18 (2) Established programs in foreign countries
19 related to detection of SARS-CoV-2 by canine
20 units.

21 (3) Detection approaches and solutions related
22 to the optimization of detection of SARS-CoV-2 by
23 canines.

24 (4) Private industry approaches aimed to facili-
25 tate detection of SARS-CoV-2 using canine units.

1 (e) THIRD-PARTY VALIDATION AND
2 VERIFICATION.—The Administrator shall ensure that any
3 screening solutions developed pursuant to the study re-
4 quired by subsection (a) undergo validation and verifica-
5 tion analysis by a third party with appropriate expertise
6 to ensure accuracy of data obtained from the study.

7 (f) REPORT REQUIRED.—Not later than 120 days
8 after the date of the enactment of this Act, the Adminis-
9 trator shall submit to Congress a report—

10 (1) setting forth the results of the study re-
11 quired by subsection (a), including the assessments
12 required by subsections (b) and (c); and

13 (2) making a recommendation with respect to
14 whether to proceed with implementing a program to
15 use canine units at airports to screen passengers, in-
16 dividuals accompanying passengers, crew members,
17 and other individuals who pass through airports and
18 airport security screening locations, for infection
19 with SARS-CoV-2.
