

118TH CONGRESS  
1ST SESSION

# S. RES. 170

Supporting the goals and ideals of World Malaria Day.

---

IN THE SENATE OF THE UNITED STATES

APRIL 25, 2023

Mr. WICKER (for himself and Mr. COONS) submitted the following resolution;  
which was referred to the Committee on Foreign Relations

---

## RESOLUTION

Supporting the goals and ideals of World Malaria Day.

Whereas April 25 of each year is recognized internationally  
as World Malaria Day;

Whereas malaria is a leading cause of death and disease in  
many developing countries, with nearly ½ of all cases  
globally occurring in only 4 countries, despite being pre-  
ventable and treatable;

Whereas, at the end of 2021, there were an estimated  
247,000,000 malaria cases in 84 endemic countries and  
619,000 deaths from malaria;

Whereas young children and pregnant women are particularly  
vulnerable to, and disproportionately affected by, malaria,  
with children younger than 5 years of age accounting for  
76 percent of malaria deaths each year;

Whereas, between 2019 and 2021, an estimated additional 13,400,000 cases of malaria were attributed to disruptions during that period of the COVID–19 pandemic;

Whereas malaria was once a leading cause of death in the United States;

Whereas fighting malaria is in the national interest of the United States because reducing the risk of malaria protects members of the Armed Forces and other people of the United States serving overseas in malaria-endemic regions, and reducing malaria deaths helps to lower risks of instability in less developed countries;

Whereas the support of the United States for efforts to fight malaria—

- (1) is in the diplomatic and moral interests of the United States;
- (2) generates goodwill toward the United States; and
- (3) highlights the values of the people of the United States through the work of governmental, nongovernmental, and faith-based organizations of the United States;

Whereas, between 2000 and 2021, global investments made in malaria intervention programs averted an estimated 2,000,000,000 malaria cases and 11,700,000 malaria deaths;

Whereas the Government of the United States has played a leading role in the recent progress made toward reducing the global burden of malaria, particularly through the President’s Malaria Initiative and the contribution of the United States to the Global Fund to Fight AIDS, Tuberculosis and Malaria;

Whereas, in fiscal year 2021, the President's Malaria Initiative protected nearly 100,000,000 individuals by providing them with insecticide-treated bednets, more than 21,000,000 individuals by providing them with indoor insecticide spraying, more than 8,000,000 children by providing them with seasonal preventive treatments, and more than 5,000,000 women by providing them with preventive treatments in pregnancy;

Whereas the United States is the largest donor to the Global Fund to Fight AIDS, Tuberculosis and Malaria, and every \$1 contributed by the United States leverages an additional \$2 from other donors, as required by law; and

Whereas the Government of the United States is pursuing a comprehensive approach to ending malaria deaths through the President's Malaria Initiative and the United States Agency for International Development, with assistance from the Centers for Disease Control and Prevention, the Department of State, the Department of Health and Human Services, the National Institutes of Health, the Department of Defense, and private sector entities:

Now, therefore, be it

1       *Resolved*, That the Senate—

2              (1) supports the goals and ideals of World Malaria Day;

4              (2) recognizes the importance of reducing malaria prevalence and deaths to improve overall child  
5              and maternal health, especially in sub-Saharan Africa;

8              (3) commends the recent progress made toward  
9              reducing global malaria morbidity, mortality, and

1 prevalence, particularly through the efforts of the  
2 President's Malaria Initiative and the Global Fund  
3 to Fight AIDS, Tuberculosis and Malaria;

4 (4) commends the efforts and achievements of  
5 endemic countries in preventing and treating ma-  
6 laria at home, with locally driven programs;

7 (5) welcomes ongoing public-private partner-  
8 ships to research and develop more effective and af-  
9 fordable tools for malaria prevention, diagnosis,  
10 treatment, and vaccination;

11 (6) recognizes the goals, priorities, and authori-  
12 ties to combat malaria set forth in the Tom Lantos  
13 and Henry J. Hyde United States Global Leadership  
14 Against HIV/AIDS, Tuberculosis, and Malaria Re-  
15 authorization Act of 2008 (Public Law 110–293;  
16 122 Stat. 2918);

17 (7) supports efforts to reduce malaria case inci-  
18 dence and malaria mortality rates by not less than  
19 90 percent by 2030;

20 (8) supports continued leadership by the United  
21 States in bilateral, multilateral, and private sector  
22 efforts to combat malaria and to work with devel-  
23 oping countries to create long-term strategies to in-  
24 crease ownership over malaria programs; and

1                             (9) encourages other members of the inter-  
2                             national community to sustain and increase their  
3                             support for, and financial contributions to, efforts to  
4                             combat malaria worldwide.
