

**DEPARTMENT OF TAXATION
2022 Fiscal Impact Statement**

1. **Patron** Jennifer A. Kiggans
3. **Committee** House Finance
4. **Title** Sales and Use Tax Exemption; Aircraft Components

2. **Bill Number** SB 701
House of Origin:
 Introduced
 Substitute
 Engrossed
- Second House:**
 In Committee
 Substitute
 Enrolled

5. Summary/Purpose:

This bill would extend from July 1, 2022 to July 1, 2025 the sunset date for the sales and use tax exemption for parts, engines, and supplies used for maintaining, repairing, or reconditioning aircraft or any aircraft's avionics system, engine, or component parts. It would also clarify that for manned systems, the term "aircraft" includes only aircraft with a maximum takeoff weight of at least 2,400 pounds.

If enacted during the regular session of the 2022 General Assembly, this bill would become effective July 1, 2022.

6. Budget amendment necessary: No

7. No Fiscal Impact: (See Line 8.)

8. Fiscal implications:

Administrative Costs

The Department of Taxation considers implementation of this bill as routine and does not require additional funding.

Revenue Impact

Because the extension of expiring Retail Sales and Use Tax exemptions is assumed in the revenue forecast, this bill would have no impact on state revenue.

9. Specific agency or political subdivisions affected: Department of Taxation

10. Technical amendment necessary: No

11. Other comments:

Current Law

Legislation enacted during the 2017 General Assembly exempted from the Retail Sales and Use Tax parts, engines, and supplies used for maintaining, repairing, or reconditioning aircraft or any aircraft's avionics system, engine, or component parts. The exemption covers both manned and unmanned systems but does not cover tools or equipment. The exemption does not restrict the sales tax exemption available to scheduled common carriers under current law.

Since most common carrier airlines already qualify for the exemption enumerated in *Va. Code* § 58.1-609.3(6), the two identifiable groups of taxpayers who benefit from this exemption are unscheduled common carriers and owners of private planes. This exemption allows those two groups of aircraft owners to purchase parts, engines, and supplies used to maintain, repair, and recondition their aircraft and avionic systems exempt from the Retail Sales and Use Tax. The inclusion of unmanned systems within the law means that drones are eligible for the exemption as well.

Pursuant to Item 3-5.14 of the 2020 Appropriation Act, the Department published a report regarding the revenue impact of every sales tax exemption and income tax credit scheduled to expire on or before June 30, 2025. This report included information regarding the sales tax exemption for aircraft components. See 2020 Report Document 487.

In addition, Item 3-5.14 of the 2021 Appropriation Act prohibits the General Assembly from advancing the sunset date of any existing sales tax exemption beyond June 30, 2025.

Proposal

This bill would extend from July 1, 2022 to July 1, 2025 the sunset date for the sales and use tax exemption for parts, engines, and supplies used for maintaining, repairing, or reconditioning aircraft or any aircraft's avionics system, engine, or component parts. It would also clarify that for manned systems, the term "aircraft" includes only aircraft with a maximum takeoff weight of at least 2,400 pounds.

If enacted during the regular session of the 2022 General Assembly, this bill would become effective July 1, 2022.

Similar Legislation

House Bill 462 is identical to this bill, except that it would provide a July 1, 2026 sunset date.
