Description						
creation of a Joint Committee on State Mandates and required funding of state mandates						

Assumptions Used in Arriving at Fiscal Estimate

The bill stipulates that a state agency may not promulgate a rule or take an action that imposes a mandate and that a state agency shall not take an action required by law if the action would impose a mandate, unless there is a sufficient amount to fund the mandate.

Fiscal Effect

The bill would impact a wide variety of administrative rules that the department promulgates for air, groundwater, drinking water, surface water, or wastewater standards; design and operation of municipally-owned drinking water facilities, wastewater treatment facilities or landfills; source water protection, stormwater control, municipal dredging, recycling and many other activities that may be conducted by a local unit of government.

Statutes already prohibit the department from continuing work on a rule if it is determined that the rule will exceed \$10,000,000 or more in implementation and compliance costs over any 2-year period.

The fiscal effect of the bill is indeterminate at both the state and local level.

Long-Range Fiscal Implications
