14 alternative telecommunications utilities; telecommunications provider of
15 last-resort obligations; telecommunications intrastate switched access rates;
16 interconnected voice over Internet protocol service; and use of transmission
17 equipment and property by video service providers.

Analysis by the Legislative Reference Bureau

The bill does all of the following: 1) makes changes to the authority of the Public Service Commission (PSC) over telecommunications utilities; 2) imposes requirements on certain intrastate switched access rates; 3) eliminates mandatory telecommunications tariffs except for intrastate switched access service; 4) specifies the PSC's authority over interconnected voice over Internet protocol (interconnected VOIP) service; 5) makes changes to the PSC's authority for ensuring universal access to telecommunications service; 6) imposes requirements regarding the availability of basic voice service; 7) makes changes to requirements for the use of another person's transmission equipment and property by public utilities and telecommunications providers; and 8) makes other changes to telecommunications regulation.

TELECOMMUNICATIONS UTILITY REGULATION

Under current law, with certain exceptions, the PSC regulates a telecommunications provider that provides basic local exchange service as either a telecommunications utility (TU) or an alternative telecommunications utility (ATU). In general, the PSC has certified as TUs those telecommunications providers that are incumbent local exchange carriers (ILECs) under federal law, which are telecommunications providers that resulted from the breakup of the Bell System pursuant to a federal antitrust action. In general, the PSC has certified as ATUs those telecommunications providers that are competitive local exchange carriers (CLECs) under federal law, which are telecommunications providers that compete with ILECs to provide basic local exchange service.

Under current law, TUs are subject to varying degrees of regulation by the PSC, depending on certain factors, such as whether the TU has elected price regulation, under which the PSC regulates the rates charged by a TU, but not the TU's rate of return. The degree of PSC regulation also depends on whether a TU is a cooperative association, or whether the TU is a "small TU," which is a TU that had fewer than 50,000 access lines in this state on January 1, 1984. With certain exceptions, current law exempts an ATU from PSC regulation, except that, if certain conditions are satisfied, the PSC may impose on an ATU a requirement that otherwise applies to a TU or other public utility. In addition, ATUs, like certain other persons who provide active retail voice communications service, must collect from customers and remit to the PSC a monthly police and fire protection fee that is used for shared revenue payments.

ATUs. Under this bill, ATUs are subject to the intrastate switched access rate, tariff, and interconnected VOIP requirements described below, and to the monthly police and fire protection fee described above. In addition, the bill limits the additional requirements that the PSC may impose on an ATU. Under the bill, the PSC may impose requirements that relate only to the following: 1) submission of stockholder and other business management information; 2) PSC examination of accounting and other business records; 3) use of and connection to transmission equipment and property by other telecommunications providers; 4) confidential treatment of records by the PSC; 5) rates and costs of unbundled network elements; 6) interconnection agreements and related requirements; 7) telephone caller identification, pay-per-call, and toll-free services; 8) PSC privacy rules; 9) universal service and contributions to the state's universal service fund; 10) access to telecommunications emergency services; 11) restrictions on resale or sharing certain services, products, and facilities; 12) violations of rules of the Department of Agriculture, Trade and Consumer Protection (DATCP) regarding advertising and sales and collection practices; 13) transfer of local exchange customers to other telecommunications providers; 14) PSC questionnaires and other information requests; 15) changes to PSC orders and reopening PSC cases; 16) PSC-required tests; 17) conditional, emergency, and supplemental PSC orders; 18) timing of effect of PSC orders; 19) court review of PSC orders; 20) injunction procedures; 21) enforcement duties of the PSC, the attorney general, and district attorneys and related court venues; 22) penalties related to information and record requests; 23)

forfeitures; 24) abandonment or discontinuance of lines, services, and rights-of-way; 25) assessments for reimbursement of PSC expenses; 26) assessments for telephone relay service; and 27) assessments for enforcement of certain consumer protection requirements by DATCP.

As under current law, the bill allows the PSC to impose a requirement specified above if the PSC finds that the imposition is in the public interest. The bill also provides that, if the PSC imposes such a requirement on an ATU, the PSC must impose the same requirement at the same level of regulation on all other ATUs. The bill allows the PSC, based on the public interest, to impose other requirements on an ATU related to the reasonableness and adequacy of intrastate switched access service and wholesale telecommunications service. However, the PSC is not required to impose the same requirement at the same level on all other ATUs.

In addition, the bill provides that, except for a local government ATU, certification as an ATU is on a statewide basis and that any ATU certification issued by the PSC before the bill's effective date is considered amended to be a statewide certification. Also, with certain exceptions, the bill allows the PSC to deny certification as an ATU only if the PSC finds that the applicant for certification does not have the financial, managerial, or technical capabilities to provide service or comply with requirements applicable to ATUs. The bill also allows an ATU to require the PSC to grant recertification as an ATU. Upon recertification, the ATU is subject to the requirements for ATUs described above. However, the recertification terminates all regulatory requirements related to the prior certification that were previously imposed on the ATU by the PSC and that are inconsistent with the bill's requirements, unless the ATU requests to remain subject to certain of those requirements.

TUs. The bill exempts TUs from requirements relating to all of the following: 1) PSC classification of public utility service; 2) PSC authority regarding production of records, audits of accounts, service measurement standards, and test results; 3) PSC authority to enter premises; 4) PSC valuation of utility property; 5) accounting requirements, including depreciation rates and new construction accounting; 6) reporting of expenses, profit, and other items; 7) PSC reports of utility property values and other financial data; 8) filing of rates and PSC approval of rates; 9) prohibition against unjust discrimination among customers; 10) certain prohibitions regarding the provision of service to customers; 11) construction, installation, or operation of new facilities; 12) affiliated interest requirements; 13) certain municipal authority to regulate public utilities; 14) dissolution and reorganization; 15) liability for treble damages; 16) PSC enforcement of certain unfair trade practice orders; 17) private causes of actions by persons injured by certain violations of law by TUs; and 18) alternate dispute resolution requirements of the PSC. Except for wholesale telecommunications service, the bill also exempts TUs from certain enforcement authority of the PSC.

The bill makes changes to current law to ensure that small TUs, and TUs that are cooperatives, are subject to the foregoing exemptions. The bill also eliminates the PSC's authority to order an applicant for certification as a TU to satisfy any conditions the PSC considers necessary to protect the public interest. In addition,

the bill repeals the requirements that apply to TUs under current law that apply to the following: 1) the offering of new telecommunications services or jointly offering services with other TUs; 2) classification of TU service; 3) promotional rates; 4) PSC authority regarding contracts between TUs and individual customers; 5) cross-subsidization requirements for nonlocal government TUs; and 6) consolidations and mergers. Also, the bill repeals price regulation of TUs and terminates any requirements imposed by the PSC on price-regulated TUs, as well as repeals the PSC's authority to impose partial deregulation and other types of alternative regulation on TUs. However, if a TU is subject to an alternative regulation plan under current law, the bill provides that, unless the TU terminates the plan, the TU remains regulated pursuant to the plan, except to the extent that the plan is inconsistent with the bill's tariff or intrastate switched access rates requirements.

The bill allows a TU to terminate its certification as a TU and have the PSC certify the TU as an ATU. Upon certification as an ATU, all regulatory requirements related to the former TU certification that are inconsistent with the bill's requirements are terminated, unless the TU requests to remain subject to certain of the requirements. In addition, the formerly certified TU is subject to the same requirements as an ATU. Also, the formerly certified TU's wholesale telecommunications services and rates are subject to the PSC's authority regarding reasonable rates and adequate service, and the formerly certified TU is subject to the basic voice requirements discussed below. In addition, if the formerly certified TU was subject to price regulation under current law, its intrastate dedicated access rates must mirror its interstate dedicated access rates.

The bill allows a TU to require the PSC to issue an order recertifying the TU as a TU, but generally regulating the TU like an ATU, except that the recertified TU is also subject to the basic voice requirements discussed below. Such a recertification terminates the TU's prior certification, and all regulatory requirements related to the prior certification that are inconsistent with the bill's requirements, unless the TU requests to remain subject to certain of those requirements.

If the PSC issues an order certifying a TU as an ATU, or recertifying a TU as a TU that is regulated like an ATU, the order operates as a limited waiver of the TU's right to the following: 1) an exemption from certain interconnection requirements under federal law that apply to ILECs that are rural telephone companies; and 2) suspension or modification of certain interconnection requirements under federal law. The bill provides that, except for the foregoing limited waivers, the state's telecommunications law is not intended to reduce or expand the scope and application of federal telecommunications law, including the PSC's authority under federal law.

INTRASTATE SWITCHED ACCESS RATES

The bill imposes requirements on intrastate switched access rates that depend on whether a telecommunications provider is a large or small ILEC, new nonincumbent, or large or small nonincumbent, as defined in the bill. The bill defines "switched access rates" as rates charged for providing switched access to a local exchange network for enabling the origination or termination of

telecommunications service within the local exchange. In general, federal law provides that the Federal Communications Commission regulates interstate rates and the states regulate intrastate rates.

Large ILECs. The bill defines “large ILEC” as an ILEC that, with any ILEC affiliates, had 150,000 or more access lines in this state as of January 1, 2010. No later than two years after the bill’s effective date, a large ILEC must reduce its intrastate switched access rates by an amount equal to 25 percent of the difference between its intrastate and interstate switched access rates. No later than three years after the bill’s effective date, a large ILEC must further reduce its intrastate switched access rates by an amount equal to 33 percent of the difference between its intrastate and interstate switched access rates. No later than four years after the bill’s effective date, a large ILEC must further reduce its intrastate switched access rates by an amount equal to 50 percent of the difference between its intrastate and interstate switched access rates. No later than five years after the bill’s effective date, a large ILEC must further reduce its intrastate switched access rates to mirror its interstate switched access rates and, beginning on that date, may not charge intrastate switched access rates that are higher than its interstate switched access rates.

New nonincumbents. The bill defines “new nonincumbent” as a telecommunications provider that is not an ILEC and that was initially certified as a TU or an ATU on or after January 1, 2011, except that “new nonincumbent” does not include an ATU that was formerly certified as a TU. Within 30 days after the bill’s effective date, the bill prohibits a new nonincumbent from charging intrastate switched access rates that are higher than its interstate switched access rates.

Large nonincumbents. The bill defines “large nonincumbent” as a telecommunications provider, other than an ILEC, that had 10,000 or more access lines in the state as of January 1, 2010, and that was initially certified as a TU or an ATU before January 1, 2011. The bill prohibits a large nonincumbent from charging intrastate switched access rates that are higher than the rates it charged on January 1, 2011, except for increases that result in mirroring interstate switched access rates. No later than four years after the bill’s effective date, a large nonincumbent must reduce its intrastate switched access rates by an amount equal to 33 percent of the difference between its intrastate and interstate switched access rates. No later than five years after the bill’s effective date, a large nonincumbent must further reduce its intrastate switched access rates by an amount equal to 50 percent of the difference between its intrastate and interstate switched access rates. No later than six years after the bill’s effective date, a large nonincumbent must further reduce its intrastate switched access rates to mirror its interstate switched access rates and, beginning on that date, may not charge intrastate rates that are higher than its interstate rates.

Other requirements. The bill provides that, except to enforce the above requirements, the PSC may not investigate, review, or set intrastate switched access rates for large ILECs, new nonincumbents, or large nonincumbents. Also, during the four-year period beginning on the bill’s effective date, the PSC is prohibited from investigating, reviewing, or setting the intrastate switched access rates of a “small

ILEC,” which the bill defines as an ILEC that, with any ILEC affiliates, had fewer than 150,000 access lines in this state as of January 1, 2010. In addition, during the three-year period beginning on the bill’s effective date, the PSC is prohibited from doing the same with respect to a “small nonincumbent,” which the bill defines as a telecommunications provider, other than an ILEC, that had fewer than 10,000 access lines in the state as of January 1, 2010, and that was initially certified as a TU or an ATU before January 1, 2011. However, the bill allows the PSC to enforce reductions in intrastate switched access rates ordered by the PSC prior to the bill’s effective date. Also, the bill allows the PSC to approve certain increases in intrastate switched access rates that are included in tariff revisions, which are discussed below.

TARIFFS

In general. The bill allows, but does not require, a TU or an ATU to do any of the following: 1) retain on file with the PSC tariffs showing the service rates, tolls, and charges the TU or ATU has established for some or all services that the TU or ATU performs in the state; 2) file new tariffs with the PSC for some or all of such services; 3) withdraw tariffs for any service, except for intrastate switched access service; and 4) file revised tariffs that change the rates, tolls, charges, or terms and conditions under tariffs on file with the PSC. Except for changes that constitute increases in intrastate switched access rates, tariff revisions are effective at the time specified in the revised tariff as filed with the PSC. Except for new tariffs for intrastate switched access services, a new tariff is effective on the date specified in the tariff, unless the PSC, within ten days after the new tariff is filed, suspends the new tariff. If the PSC suspends a new tariff, the PSC may modify the new tariff only to the extent that the new tariff violates certain requirements that apply to the TU or ATU, and only after granting the TU or ATU an opportunity for a hearing. If the PSC fails to modify the new tariff within deadlines specified in the bill, the new tariff is effective as filed.

The bill also allows a tariff for a service that permits a TU or an ATU to enter into an individual contract with an individual customer under rates, terms, or conditions that are different from those specified for the service in the tariff. Except for such an individual contract, the bill prohibits a TU or an ATU from receiving for a service more or less compensation than that specified for the service in a tariff, and prohibits a TU or an ATU from receiving compensation for a service that is not specified in a tariff. Also, copies of tariffs filed under the bill must be made available to consumers in a form and place readily accessible to the public.

Intrastate switched access service. No later than 90 days after the bill’s effective date, a TU or an ATU that provides intrastate switched access service must have on file with the PSC a tariff showing the rates, tolls, and charges for the service. The bill provides that the absence of such a tariff before that deadline does not prohibit a TU or an ATU from charging intrastate switched access rates that comply with the requirements for intrastate switched access rates described above or that are charged pursuant to a prior order of the PSC. If a TU or an ATU must file a new tariff to comply with the foregoing requirement, and the tariff includes intrastate switched access rates that are higher than the rates the TU or ATU charged on

January 1, 2011, the PSC must approve the tariff, unless certain exceptions are satisfied.

The PSC is authorized to enforce payment of rates specified in a tariff for intrastate switched access rates. Once such a tariff is in effect, the bill prohibits a TU or an ATU from withdrawing the tariff. However, under certain circumstances, a TU or an ATU may revise the tariff to increase intrastate switched access rates. The PSC must approve the increase, except for certain specified increases that are effective at the time specified in a revised tariff.

INTERCONNECTED VOIP SERVICE

With certain exceptions, the bill provides that interconnected VOIP service is exempt from PSC regulation. Under the bill, "interconnected VOIP service" has the same meaning as under federal law, which is a service requiring a broadband connection and Internet protocol-compatible customer premises equipment that allows the user to engage in real-time, two-way communication over the public switched telephone network.

One exception to the exemption is that an entity that provides interconnected VOIP service must make contributions to the state's universal service fund based on the entity's revenues from providing intrastate interconnected VOIP service. The bill specifies the methods for calculating such revenues. Under the other exceptions to the exemption, a provider of interconnected VOIP service must do the following, which apply to other telecommunications providers under current law: 1) impose a monthly police and fire protection fee on its customers; 2) pay assessments for DATCP enforcement of certain consumer protection requirements; and 3) pay assessments for a statewide telecommunications relay service. In addition, interconnected VOIP service is subject to the PSC's authority over interconnection agreements under current law. The bill also provides that, unless otherwise provided under federal law, an entity that provides interconnected VOIP service must pay intrastate switched access rates. Also, unless otherwise provided under federal law, if the entity provides intrastate switched access service in connection with the interconnected VOIP service, the entity is allowed to charge intrastate switched access rates for the service.

UNIVERSAL SERVICE

Under current law, the state's universal service fund is used for, among other things, supporting programs that promote access to essential and advanced telecommunications services. Current law requires the PSC to promulgate rules that define the essential and advanced telecommunications services that must be available to all customers at affordable prices as a necessary component of universal service. The essential and advanced telecommunications services must be based on market, social, economic development, and infrastructure development principles rather than on specific technologies or providers.

This bill repeals the foregoing requirements regarding PSC rules and requires instead that certain telecommunications providers make available to their customers all essential telecommunications services. In addition, the bill eliminates advanced telecommunications services from the programs supported by the state's universal service fund. The bill defines "essential telecommunications services" as

services or functionalities listed in a regulation by the Federal Communications Commission as of January 1, 2010. The bill's requirements apply to a telecommunications provider that is designated under federal law as a telecommunications carrier eligible to receive support from the federal universal service fund. Also, the bill provides that a telecommunications provider may provide essential telecommunications services itself or through an affiliate or through the use of any available technology or mode. In addition, the bill limits the requirements that the PSC may impose on a wireless telecommunications provider that receives support from the federal universal service fund but does not receive support from the state's universal service fund.

BASIC VOICE SERVICE

The bill requires an ILEC to make basic voice service available to all residential customers within the ILEC's local exchange area. "Basic voice service" is defined, in part, as two-way voice communication service within a local calling area. The bill allows an ILEC to provide basic voice service through an affiliate or through the use of any available technology or mode.

The bill also allows an ILEC to apply to the PSC for a waiver from the foregoing requirements. The PSC must grant a waiver if the waiver is in the public interest or effective competition exists in the local exchange area. If the PSC fails to meet a 120-day deadline for the waiver request, the waiver request is considered granted by operation of law. In addition, the PSC must grant a waiver if the PSC previously found that effective competition existed. However, the PSC may not grant a waiver based on a previous finding of effective competition until after June 1, 2012. If the PSC fails to meet a 20-day deadline for a waiver request based on a previous finding of effective competition, the waiver request is considered granted by operation of law. The bill also provides that decisions of the PSC prior to the effective date of the bill that eliminate an ILEC's provider of last-resort obligations remain in force and effect. Finally, the bill provides that none of the bill's basic voice service requirements apply after April 30, 2013.

USE OF TRANSMISSION EQUIPMENT AND PROPERTY

Current law requires any person who owns transmission equipment and property to permit, for reasonable compensation, a public utility or telecommunications provider to use the equipment and property, if certain requirements are satisfied. Current law defines "transmission equipment and property" to include any conduit, subway, pole, tower, transmission wire, or other equipment, that is on, over, or under any street or highway. The PSC is authorized to resolve disputes regarding such uses of transmission equipment and property, and may prescribe reasonable conditions and compensation for such uses.

This bill defines "transmission equipment and property" so that it also includes any equipment and property that is on, over, or under any right-of-way owned or controlled by a county, city, village, or town or public utility owned or operated by any county, city, village, or town. In addition, the bill allows a person granted a video service or cable television franchise under current law, in addition to a public utility or telecommunications provider, to use transmission equipment and property under the foregoing conditions. Also, the bill specifies that pole attachments constitute

transmission equipment and property that are subject to the foregoing requirements.

OTHER CHANGES

The bill makes other changes to telecommunications regulation, including the following:

1. The bill eliminates the conveyance of data or other information from the definition of “telecommunications service” for purposes of the statutes administered by the PSC and certain other statutes. As a result, the definition is limited to the conveyance of voice communication, except that the bill also specifies that the definition includes switched access service.

2. Under current law, a company that provides telecommunications service may, subject to municipal regulation and PSC review, maintain lines within public rights-of-way. Current law does not define “telecommunications service” for this purpose. The bill defines “telecommunications service” for this purpose to include the conveyance of voice communication, data, or other information.

3. The bill eliminates a prohibition under current law against TUs and other telecommunications providers from giving certain preferences to their consumer retail departments or affiliates.

4. The bill eliminates certain requirements under current law that apply to certain telecommunications providers regarding issuance of securities, capital structure, and payment of dividends.

5. The bill exempts telecommunications providers from the PSC’s authority to require public utilities to answer questionnaires and provide certain documents to the PSC, and the bill clarifies that the PSC’s authority to require telecommunications providers to answer questionnaires applies only to matters within the PSC’s jurisdiction.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.

25 account the quantity used, the time when used, the purpose for which used, and any

1 other reasonable consideration. Each public utility shall conform its schedules of
2 rates, tolls and charges to such classification.

3 **SECTION 14.** 196.04 (1) (a) 1. of the statutes is renumbered 196.04 (1) (a) 4. and
4 amended to read:

21 and property under sub. (1) or the conditions or compensation for the use, or if there

23 which the physical connections shall be made, any public utility, any video service
24 provider, telecommunications provider, or any other interested person interested
25 may apply to the commission. If, after investigation, the commission determines

1 that public convenience and necessity require the use of the transmission equipment
2 and property or the physical connections and that the use or physical connections
3 will not result in irreparable injury to the owner or other users of the transmission
4 equipment and property or of the facilities of the public utility, video service provider,
5 or telecommunications provider or in any substantial detriment to the service to be
6 rendered by the owner or the public utility, video service provider,

22 the annual rate of depreciation required for each of its classes of fixed capital used
23 for public utility purposes, and of the composite annual rate of depreciation required
24 for such fixed capital as an aggregate, which shall constitute the public utility's

1 estimates of the amount which should be returned to it out of its rates for service, to
2 meet the depreciation of its property.

3 **SECTION 19.** 196.09 (9) of the statutes is repealed.

4 **SECTION 20.** 196.11 (2) of the statutes is amended to read:

5 196.11 (2) Any arrangement under this section shall be under the supervision
6 and regulation of the commission. The commission may order any rate, charge or
7 regulation which the commission deems necessary to give effect to the arrangement.
8 The commission may make any change in a rate, charge or regulation as the
9 commission determines is necessary and reasonable and may revoke its approval
10 and amend or rescind all orders relative to any arrangement. This subsection does
11 not apply to telecommunications cooperatives, unincorporated telecommunications
12 cooperative associations, or telecommunications utilities except as provided in s.
13 196.205.

14 **SECTION 21.** 196.13 (2) of the statutes is amended to read:

15 196.13 (2) The commission shall publish in its reports the value of all the
16 property actually used and useful for the convenience of the public of a public utility;
17 ~~other than a telecommunications utility~~, if the commission has held a hearing on the
18 public utility's rates, charges, service or regulations or if the commission has
19 otherwise determined the value of the public utility's property.

20 **SECTION 22.** 196.19 (1m) of the statutes is repealed.

21 **SECTION 23.** 196.19 (5) of the statutes is repealed.

22 **SECTION 24.** 196.191 of the statutes is created to read:

23 **196.191 Telecommunications utility and alternative**
24 **telecommunications utility tariffs.** (1) No later than the 90th day beginning
25 after the effective date of this subsection [LRB inserts date], any

1 telecommunications utility or alternative telecommunications utility that provides
2 intrastate switched access service within this state shall at all times have on file with
3 the commission a tariff showing all rates, tolls, and charges that it has established
4 and that are in force for such intrastate switched access service. The absence of such
5 a tariff before the 90th day beginning after the effective date of this subsection
6 [LRB inserts date], shall not prohibit a telecommunications utility or alternative
7 telecommunications utility from charging intrastate switched access rates for any
8 intrastate switched access service that it provides, or limit or excuse any entity from
9 its obligation to pay intrastate switched access rates, provided that such intrastate
10 switched access rates comply with the requirements of ss. 196.212 and 196.219 (2r).
11 A telecommunications utility or alternative telecommunications utility may not
12 withdraw a tariff for switched access service once the tariff is in effect. Except as
13 allowed under this section or to comply with ss. 196.212 and 196.219 (2r), a
14 telecommunications utility or alternative telecommunications utility may not file to
15 change the rates, tolls, and charges shown in a tariff for switched access service.

16 (2) Except as provided in this section and s. 196.212, notwithstanding anything
17 in this chapter to the contrary, any telecommunications utility or alternative
18 telecommunications utility may do any of the following:

19 (a) Retain on file with the commission tariffs already on file with the
20 commission as of the effective date of this paragraph [LRB inserts date], showing
21 the rates, tolls, and charges and the terms and conditions that the
22 telecommunications utility or alternative telecommunications utility has
23 established as of the effective date of this paragraph [LRB inserts date], for some
24 or all of the services performed by the telecommunications utility or alternative
25 telecommunications utility within the state or for any service in connection

1 therewith or performed by any telecommunications utility or alternative
2 telecommunications utility controlled or operated by the telecommunications utility
3 or alternative telecommunications utility.

4 (b) File with the commission new tariffs showing the rates, tolls, and charges
5 and the terms and conditions that the telecommunications utility or alternative
6 telecommunications utility has established, as provided in the tariff filings, for some
7 or all of the services performed by the telecommunications utility or alternative
8 telecommunications utility within the state or for any service in connection
9 therewith or performed by any telecommunications utility or alternative
10 telecommunications utility controlled or operated by the telecommunications utility
11 or alternative telecommunications utility.

12 (c) Except as provided in sub. (1), withdraw a tariff for any service by providing
13 notice to the commission.

14 (d) 1. Except as provided in subd. 2., change the rates, tolls, and charges and
15 the terms and conditions of a tariff on file with the commission by filing a revised
16 tariff with the commission. Except as provided in subd. 2., a proposed change in a
17 tariff shall be effective at the time specified in the revised tariff as filed with the
18 commission.

19 2. No change in a tariff that constitutes an increase in intrastate switched
20 access rates may be made unless the change is consistent with the public interest
21 factors set forth in s. 196.03 (6) and does not violate ss. 196.212 and 196.219 (2r) and
22 the commission by order, after investigation and opportunity for a hearing, approves
23 the change, except that an increase in intrastate switched access rates shall be
24 effective at the time specified in the revised tariff as filed with the commission, if
25 either of the following is satisfied:

1 a. The increase results in the intrastate switched access rates mirroring the
2 interstate switched access rates for the telecommunications utility or alternative
3 telecommunications utility.

4 b. If the telecommunications utility or alternative telecommunications utility
5 is a small telecommunications utility, the increase does not violate s. 196.212 or
6 196.219 (2r), does not exceed, in any 12-month period, the percentage increase in the
7 U.S. consumer price index for all urban consumers, U.S. city average, for the
8 previous year, and is not greater than the corresponding increase in interstate
9 switched access rates for the small telecommunications utility.

10 **(3)** (a) Except as provided in par. (b), if a telecommunications utility or
11 alternative telecommunications utility files a new tariff under sub. (2) (b), all of the
12 following apply:

13 1. The new tariff shall become effective on the date specified in the tariff, unless
14 the commission suspends the operation of the new tariff upon serving a written
15 notice of the suspension on the telecommunications utility or alternative
16 telecommunications utility within 10 days after the date of filing. The notice shall
17 include a statement of the reason under subd. 2. upon which the commission believes
18 the tariff may be modified.

19 2. The commission may modify the new tariff after an opportunity for a hearing
20 only to the extent that the tariff violates s. 196.209, 196.212, or 196.219 and only to
21 the extent that s. 196.209, 196.212, or 196.219 applies to the telecommunications
22 utility or alternative telecommunications utility.

23 3. If the commission does not conduct a hearing under subd. 2., the commission
24 shall issue its final order within 60 days after issuing the notice of suspension under
25 subd. 1. If the commission conducts a hearing, the commission shall issue its final

1 order within 120 days after issuing the notice of suspension under subd. 1. If a final
2 order is not issued within the time limits specified in this subdivision, the new tariff
3 becomes effective as filed.

4 (b) If a telecommunications utility or alternative telecommunications utility
5 files a new tariff under sub. (2) (b) to comply with sub. (1) for intrastate switched
6 access service that includes intrastate switched access rates higher than the
7 intrastate switched access rates it charged on January 1, 2011, the tariff shall not
8 be effective unless the new tariff is consistent with the public interest factors set
9 forth in s. 196.03 (6) and does not violate s. 196.212 or 196.219 (2r) and the
10 commission by order, after investigation and opportunity for a hearing, approves the
11 new tariff and rates, except that an increase in intrastate switched access rates shall
12 be effective at the time specified in the new tariff as filed with the commission if sub.
13 (2) (d) 2. a. is satisfied or, if the telecommunications utility or alternative
14 telecommunications utility is a small telecommunications utility, sub. (2) (d) 2. a. or
15 b. is satisfied.

16 (4) Nothing in this section shall give the commission jurisdiction over the rates,
17 tolls, and charges or the terms and conditions of any service that is not subject to a
18 tariff under this section.

19 (5) Every telecommunications utility or alternative telecommunications utility
20 that files a tariff with the commission under this section shall include all rates, tolls,
21 and charges and all terms and conditions that apply to the services specified in the
22 tariff.

23 (6) Nothing in this chapter prohibits a tariff for a service that permits a
24 telecommunications utility or alternative telecommunications utility to enter into a

1 contract with a customer for that tariffed service that includes rates, tolls, and
2 charges and terms and conditions that are different from those in the tariff.

3 (7) Except as provided in sub. (6), no telecommunications utility or alternative
4 telecommunications utility may charge, demand, collect, or receive more or less
5 compensation for any service for which a tariff is filed under this section than is
6 specified in the tariff, as may at the time be in force, or demand, collect, or receive
7 any rate, toll, or charge for such service not specified in the tariff.

8 (8) A copy of the tariffs filed under this section shall be made available to
9 consumers in a form and place readily accessible to the public.

10 **SECTION 25.** 196.194 (title) of the statutes is repealed.

11 **SECTION 26.** 196.194 (1) of the statutes is repealed.

12 **SECTION 27.** 196.194 (2) of the statutes is renumbered 196.194 and amended
13 to read:

14 **196.194 Gas utilities utility individual contracts.** Nothing in ss. 196.03,
15 196.19, 196.20, 196.21, 196.22, 196.37, 196.60, 196.604 and 196.625 prohibits the
16 commission from approving the filing of a tariff which permits a gas utility to enter
17 into an individual contract with an individual customer if the term of the contract
18 is no more than 5 years, or a longer period approved by the commission, and if the
19 commission determines that substitute gas services are available to customers or
20 potential customers of the gas utility and the absence of such a tariff will cause the
21 gas utility to be disadvantaged in competing for business. A tariff filed under this
22 ~~subsection~~ section shall include the condition that any such contract shall be
23 compensatory. The tariff shall include any other condition and procedure required
24 by the commission in the public interest. Within 20 days after a contract authorized
25 under this ~~subsection~~ section or an amendment to such a contract has been executed,

1 the gas utility shall submit the contract to the commission. The commission shall
2 give notice to any person, upon request, that a contract authorized under this
3 ~~subsection~~ section has been received by the commission. The notice shall identify the
4 gas utility that has entered into the contract. Within 6 months after receiving
5 substantial evidence that a contract may be noncompensatory, or upon its own
6 motion, the commission shall investigate and determine whether the contract is
7 compensatory. If the commission determines that the contract is noncompensatory,
8 the commission may make appropriate adjustments in the rates or tariffs of the gas
9 utility that has entered into the contract, in addition to other remedies under this
10 chapter. The dollar amount of the adjustment may not be less than the amount by
11 which the contract was found to be noncompensatory.

12 **SECTION 28.** 196.195 of the statutes is repealed and recreated to read:

13 **196.195 Alternative telecommunications regulation plans.** Any
14 telecommunications utility that as of the effective date of this section ... [LRB inserts
15 date], is subject to an alternative regulation plan approved by the commission under
16 s. 196.195, 2009 stats., shall remain regulated pursuant to such alternative
17 regulation plan to the extent that the alternative regulation plan is not inconsistent
18 with ss. 196.191 and 196.212, unless the telecommunications utility terminates the
19 alternative regulation plan pursuant to the terms and conditions of the plan. If such
20 an inconsistency exists, the requirements of ss. 196.191 and 196.212 shall apply to
21 the intrastate switched access rates and intrastate switched access service tariff
22 filings of such a telecommunications utility.

23 **SECTION 29.** 196.196 of the statutes is repealed.

24 **SECTION 30.** 196.198 (2) (a) of the statutes is renumbered 196.198 (2) and
25 amended to read:

1 196.198 (2) Except as provided in sub. (3), a telecommunications utility that
2 has more than 150,000 access lines in use in this state or a telecommunications
3 provider that has more than 150,000 access lines in use in this state may not charge
4 a residential customer for basic local exchange service based on the duration of a call
5 or on the time of day that a call is made. This ~~paragraph~~ subsection does not apply
6 to an extended community telephone service.

7 **SECTION 31.** 196.198 (2) (b) of the statutes is repealed.

16 **SECTION 34.** 196.198 (3) (b) (intro.) of the statutes is amended to read:

17 196.198 (3) (b) (intro.) Suspending the application of sub. (2) (a) is beneficial

22 specified in the schedules are applicable. No change may be made by any public
23 utility in its schedules except by filing the change as proposed with the commission.
24 ~~Except for a telecommunications utility, no~~ No change in any public utility rule which
25 purports to curtail the obligation or undertaking of service of the public utility shall

6 196.20 (2) (a) (intro.) ~~Except for a telecommunications utility, a~~ A proposed
7 change which constitutes a decrease in rates shall be effective at the time specified
8 in the change as filed but not earlier than 10 days after the date of filing the change

4 information about its operations in this state from the commission necessary to
5 administer ss. 196.025 (6), 196.218 (3), and 196.859.

12 DEFINITIONS. In this section, "basic voice service" means the provision to residential
13 customers of 2-way voice communication within a local calling area. "Basic voice
14 service" includes extended community calling and extended area service. "Basic
15 voice service" does not include the offering of Internet access service or any
16 discretionary or optional services that are provided to a residential customer, even
17 if provided in a bundle or package with basic voice service.

18 **(2) INCUMBENT LOCAL EXCHANGE CARRIER OBLIGATIONS.** (a) Notwithstanding any
19 other provision in this chapter, and except as provided in sub. (3), an incumbent local
20 exchange carrier shall make basic voice service available to all residential customers
21 within a local exchange area in which it operates as an incumbent local exchange
22 carrier.

23 (b) An incumbent local exchange carrier may satisfy its obligations under par.
24 (a) through an affiliate and through the use of any available technology or mode.

1 **(3) WAIVERS.** (a) An incumbent local exchange carrier may apply to the
2 commission for a waiver from compliance with sub. (2) (a) in a local exchange area.

3 (b) The commission shall grant a waiver requested under par. (a) for a local

5 1. The commission finds that the incumbent local exchange carrier
6 demonstrates that the waiver is in the public interest or that effective competition
7 exists for basic voice service in the local exchange.

8 2. The commission has made a previous finding of effective competition under
9 s. 196.195 (2), 2009 stats., for basic local exchange service in the local exchange. The

15 commission shall grant or deny the request and, if denied, the commission shall issue
16 a written decision identifying the reasons for its denial. If the commission fails to
17 grant or deny the waiver request within 120 days of its filing, the waiver request is
18 considered granted by operation of law.

19 2. The commission shall grant a waiver based on par. (b) 2. as soon as the
20 commission verifies that the commission has previously made the finding specified
21 in par. (b) 2., but no later than 20 days after the filing of the waiver request. If the
22 commission fails to grant a waiver request based on par. (b) 2. within 20 days of its
23 filing, the waiver request is considered granted by operation of law. If the
24 commission denies a waiver based on par. (b) 2., the commission shall issue a written
25 decision identifying the reasons for its denial.

5 effect as to the elimination of those obligations.

6 (b) Except to enforce this section, nothing in this section provides the
7 commission with any authority to regulate, or any jurisdiction over, incumbent local
8 exchange carriers and the rates, terms, and conditions of their services that the
9 commission does not otherwise have under this chapter.

10 **(5) SUNSET.** This section does not apply after April 30, 2013.
