AUTHORS SUBJECT TO CHANGE

1 **AN ACT to create** 48.374 of the statutes; **relating to:** a minor's authority to
2 consent to health care.

Analysis by the Legislative Reference Bureau

This bill allows a minor who is an unaccompanied youth to consent to, contract for, and receive medical, dental, or behavioral health examinations, care, or treatment without a parent's or guardian's permission, authority, or consent under certain circumstances. The bill defines "unaccompanied youth" as the term is defined under federal law, which is a homeless youth not in the physical custody of a parent or guardian.

Under the bill, in order to consent to health care, such a minor must be at least 14 years of age and must not be under the supervision of a county department of human services or social services, a licensed child welfare agency, the Department of Children and Families, or the Department of Corrections. Also under the bill, one of the following must confirm in writing that the minor is an unaccompanied youth: a local educational agency liaison for homeless children and youths designated under federal law, a school social worker or counselor, an employee who conducts intake at a shelter facility or transitional living program where the minor has been admitted as an unaccompanied youth under current law, or the director, or his or her designee, of a governmental or nonprofit entity that receives public or private funding to provide services to individuals who are homeless or to unaccompanied youth.

The bill provides as an exception that the authority of a minor to consent to health care does not apply to certain medical intervention practices if done for the purpose of changing the minor's body to correspond to a sex that is discordant with

ASSEMBLY BILL 729

the minor's biological sex. Under the bill, this exception does not apply to any of the following: 1) a medical service provided in accordance with a good faith medical decision of a minor born with a medically verifiable genetic disorder of sex development; 2) the treatment of any infection, injury, disease, or disorder that has been caused by or exacerbated by the performance of a gender transition medical procedure, whether or not that procedure was performed in accordance with state and federal law; or 3) any procedure undertaken because the minor suffers from a physical disorder, physical injury, or physical illness that would, as certified by a physician, place the minor in imminent danger of death or impairment of a major bodily function unless surgery is performed.

Under the bill, a professional who provides medical, dental, or behavioral health examinations, care, or treatment to a minor based on the minor's consent given in conformity with the bill may not be held liable in a civil or criminal action for providing those services without having obtained permission from the minor's parent or guardian.

The bill specifies that it does not apply to a minor's consent to an abortion, which under current law requires parental consent except in certain circumstances.
