1 **AN ACT** *to create* 146.43 of the statutes; **relating to:** dementia specialist
2 certification program.

Analysis by the Legislative Reference Bureau

This bill creates a dementia specialist certification program. If a nurse aide or a person designated by a care provider to coordinate and supervise resident activities attends an appropriate instructional program, completes a competency evaluation, and pays a certification fee, the Department of Health Services must certify him or her as a dementia specialist. A certificate as a dementia specialist is valid for two years. To renew the certificate, a person must provide proof to DHS of four hours of continuing education. No person may use the title “dementia specialist” or “certified dementia specialist” unless he or she is certified by DHS.

The bill requires DHS to establish standards for a curriculum for the instructional program, which includes certain instructional topics. The instructional program must consist of at least 40 hours and must include both classroom and clinical instruction. DHS must approve instructional programs and competency evaluations that meet the standards DHS established and review each instructional program at least once every two years. DHS may suspend or revoke an instructional program or competency evaluation that fails to satisfy the standards.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.
