

**FISCAL NOTE**

The fiscal impact to the State Highway Fund is indeterminable.

Source of Expenditure Increase:

The Wyoming Department of Transportation's current practice is to show the property lines on the plans, and the agency will be required to show the property corners on all plan sheets. This will be extended to overlay projects, pit layouts and maintenance activities such as pipe cleaning, slope work, and emergency repair activities that are completed by maintenance crews typically without formal plans, which is not part of the current practice. To do this, additional data will need to be collected to write agreements and identify every property corner and accurately present this information on the plans. During construction, these corners will need to be marked in the field to avoid possible damage to the monuments.

Assumptions:

This bill will increase the work necessary to complete highway construction projects and maintenance activities. The expenditures are indeterminable.
